

Baldock Town Centre

Case Study

Contractor: **Skanska**

Designer: **BDP**

Materials supplied:
Silver Grey Granite, Mid Grey Granite and Dark Green Granite

Baldock Town Centre won the best commercial project at the Horticulture Week Landscape and Amenity Awards 2009. The scheme was described as an exemplar of how to enhance a town centre. The high impact scheme completely transformed the historic market town by improving provision and enjoyment for all users.

We worked closely with the Architect prior to specification to ensure that the necessary technical requirements for the stone would be achieved. In particular we selected stones with high strength qualities and ones with a very low potential for slip.

The paved area is around 3000m2 and is set out in a 3 colour mix; silver grey fine picked, mid grey flamed and dark green flamed. We also supplied fluted drainage channels which include 20mm grooves cut on the top surface. All materials were responsibly sourced and supplied within the projects required time-scales.
