

# Cambridge, St John's College

## Case Study

Contractor: Elmswell Contractors

Architect: Edward Hutchison Landscape Architects

### Materials supplied:

*Pink Grey Granite*

*Flint Gravel*

This was an extremely complex and demanding design, featuring many bespoke items in Grey Pink Chinese granite. Large paving elements cut to more than one hundred different sizes, and special shaped coping forming planter details were a main feature.

Steps with factory cut anti-slip grooves and nosing's to the top front edges were supplied and we also supplied large threshold slabs, skirting and cladding.

This was a very nice project with clean sharp lines and interesting features.
