NATURAL STONE & PORCELAIN PAVING

Beautiful landscapes need beautiful paving, and we have one of the widest selections of stone and porcelain paving products to choose from.

AGGREGATES & GRAVELS

Bringing a natural texture to a design scheme, aggregates and gravels are tough and durable underfoot and work well in areas that need additional drainage.

ROCKERY & BOULDERS

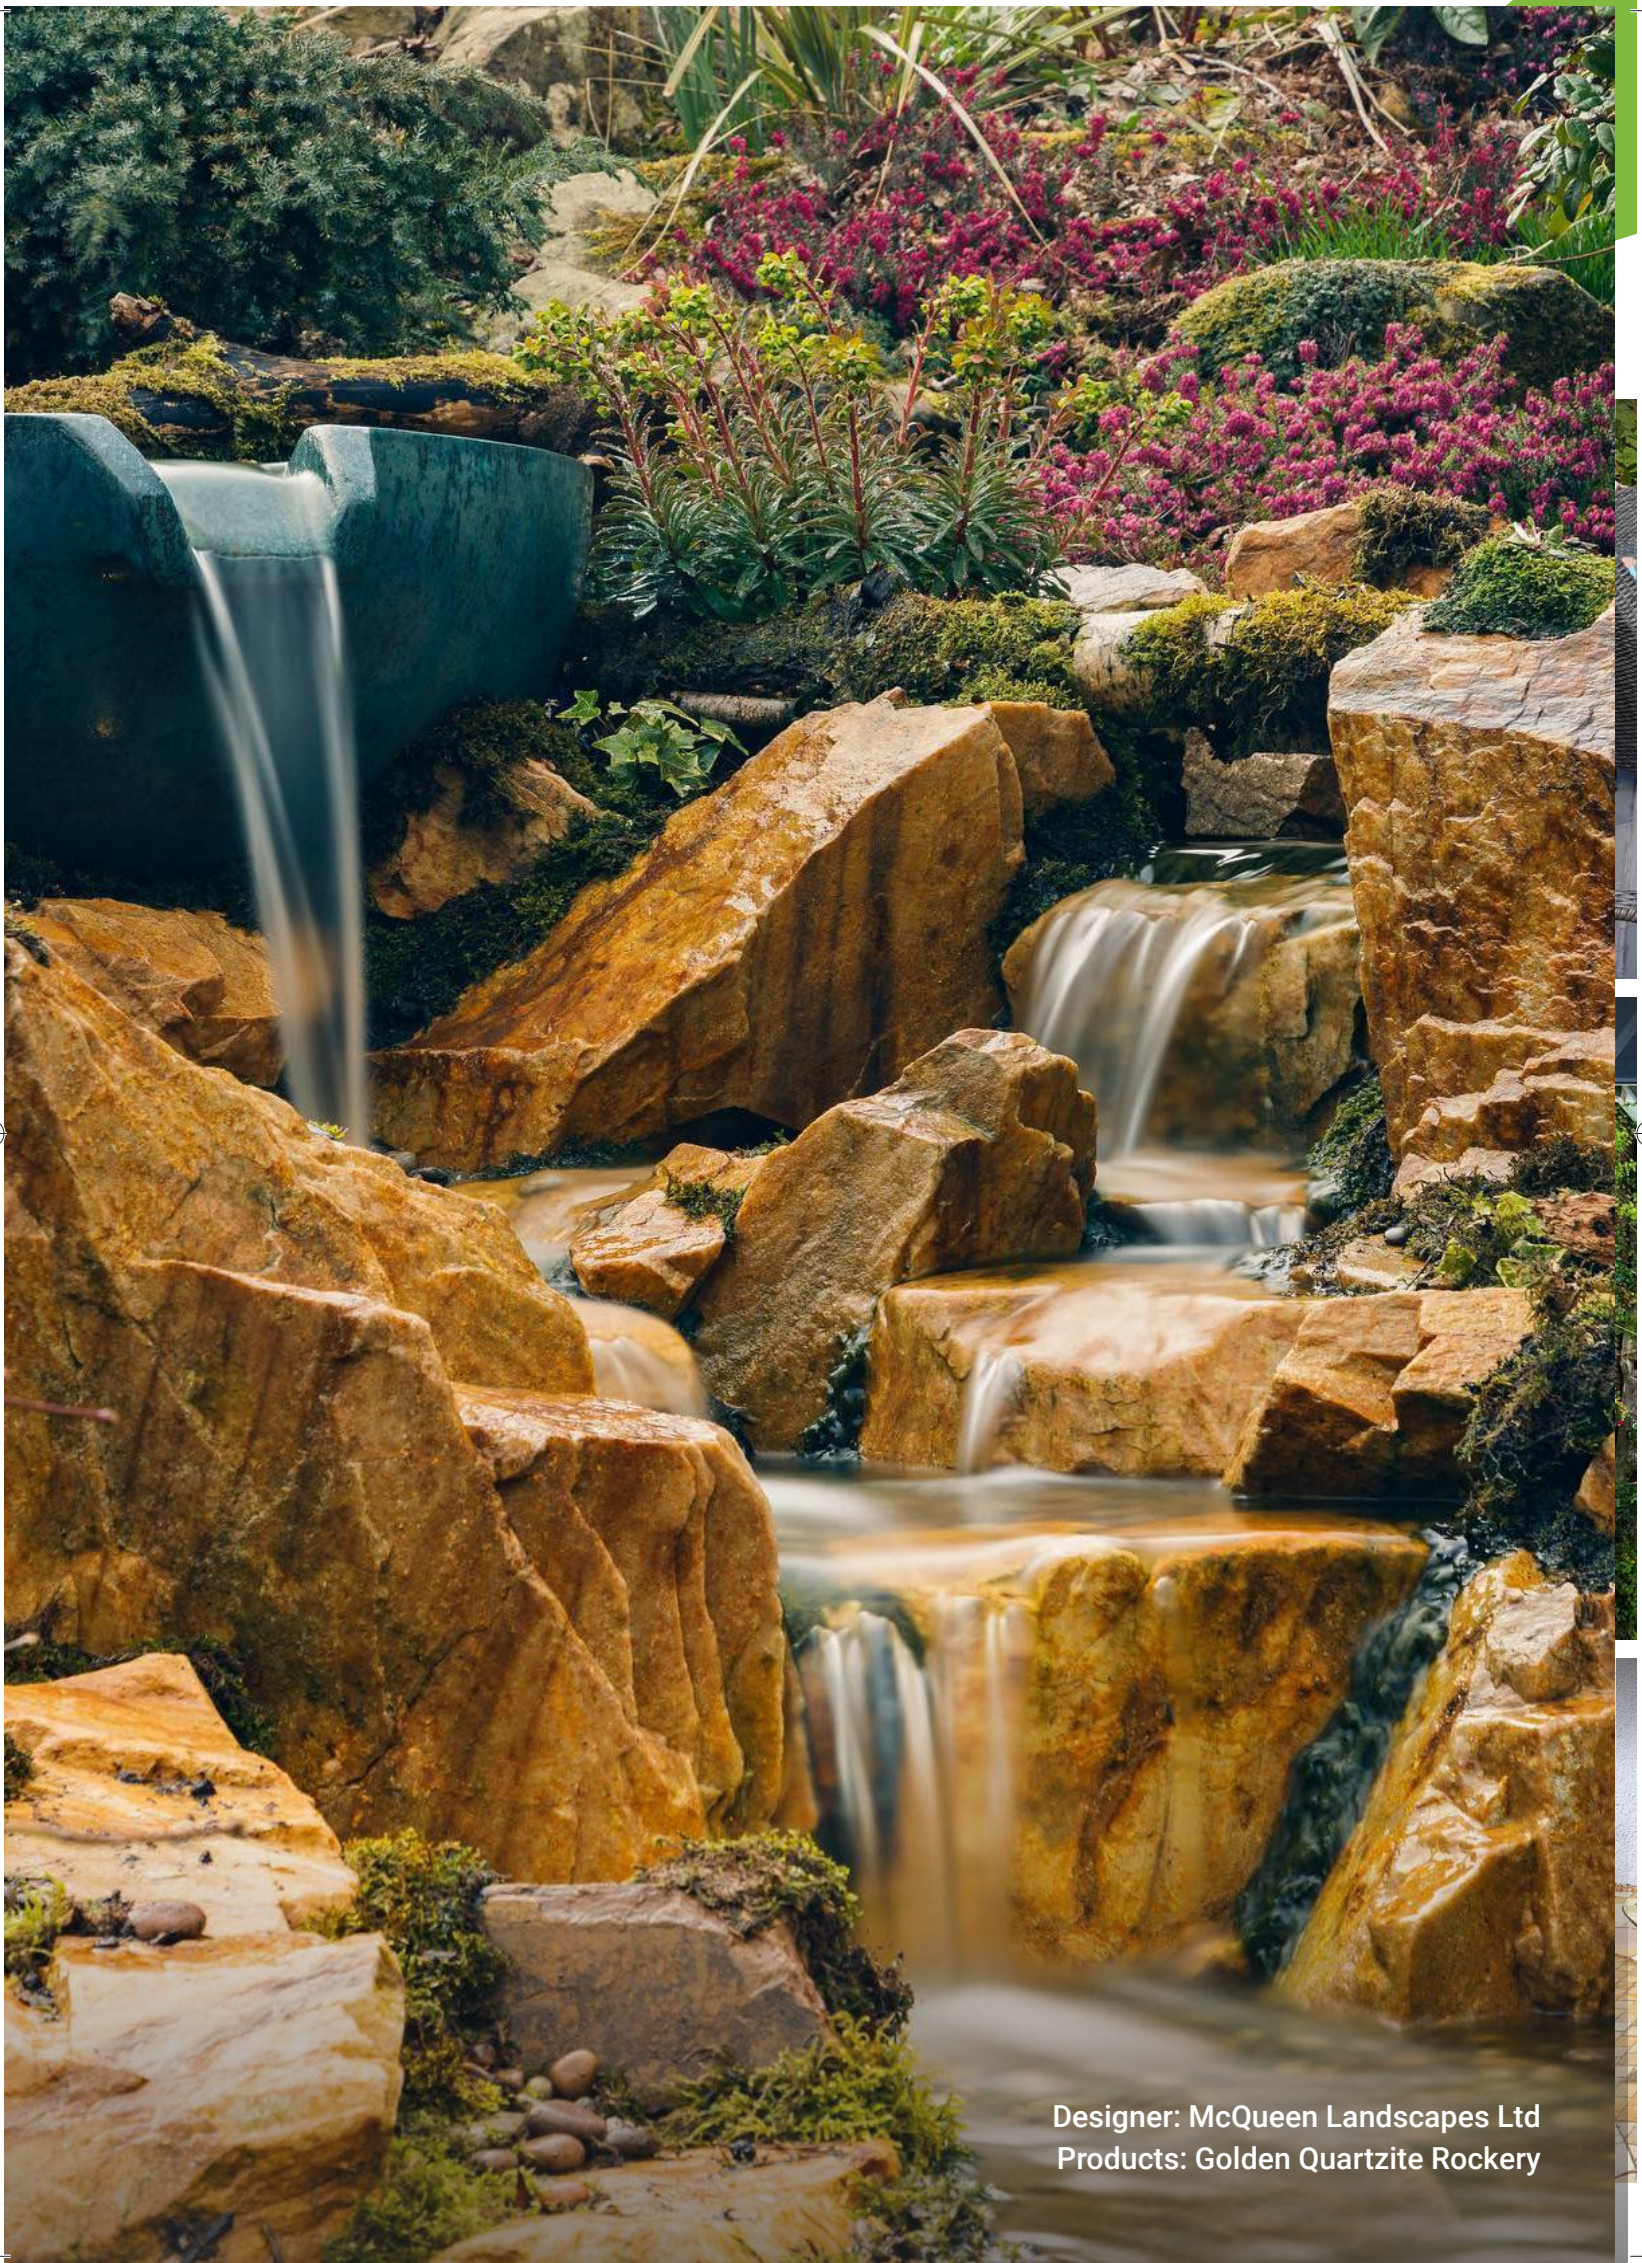

Even the most simplest of garden designs can be transformed into a dramatic outdoor scheme with a strategically placed standing stone or rockery arrangement.

Private Garden
Contractor: APB Landscaping Ltd
Pink Sandstone Paving, Flamingo Aggregate & Purple Wave Standing Stones

*Inspiring beautiful
landscapes*

Designer: McQueen Landscapes Ltd
Products: Golden Quartzite Rockery

Riven Paving

Natural stone paving flags with a 'riven' surface have been split using traditional techniques, creating a beautiful uneven texture that follows the material's natural layers. Due to the rough and unrefined texture of their surface, these highly slip-resistant products will give a homely, traditional feel to your outdoor space.

Grey Sandstone

100x200x40-70mm

Sawn Paving

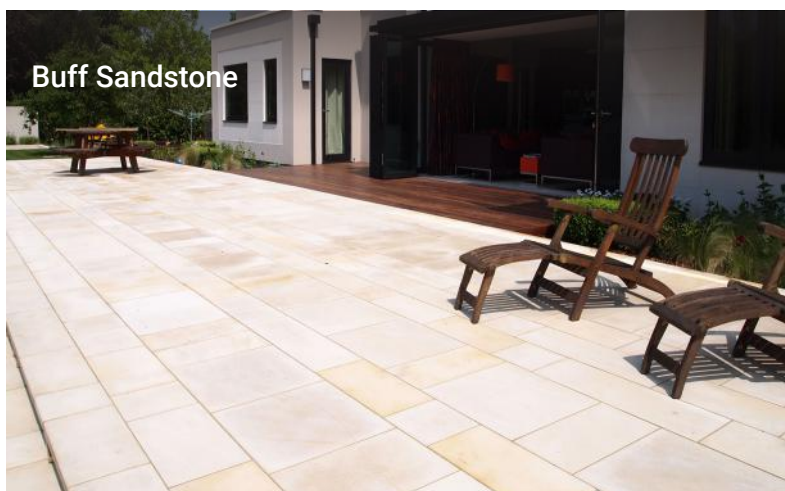

Our range of sawn paving is ideal for using in modern and contemporary landscape designs, their clean lines and attractive colours perfectly complement a more minimal, streamlined look. Consisting of four sandstones and a schist, the Sovereign range with its elegant neutral shades and soft tones brings an outstanding quality to any outdoor space.

100x200x50mm

100x150x500mm

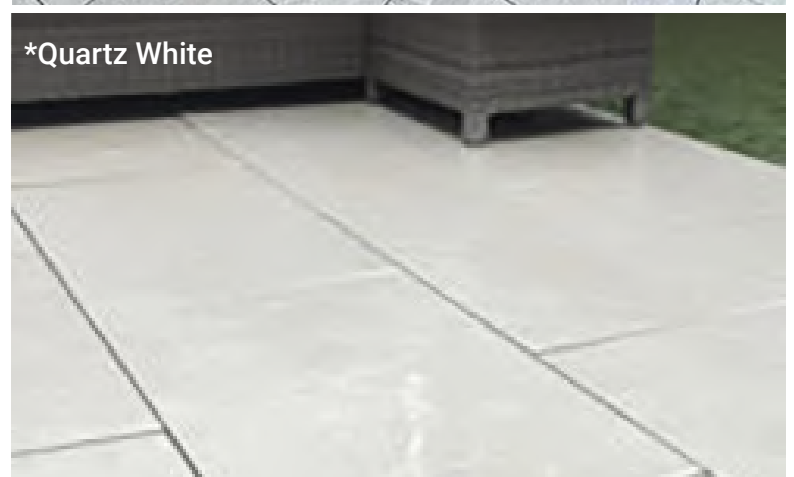

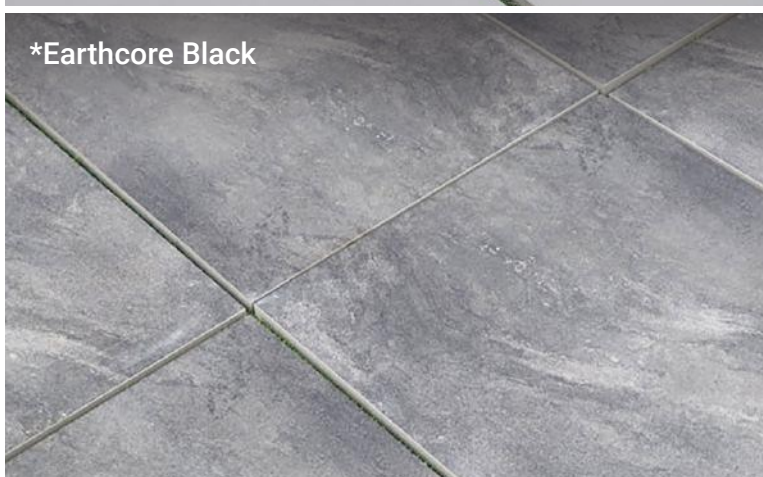

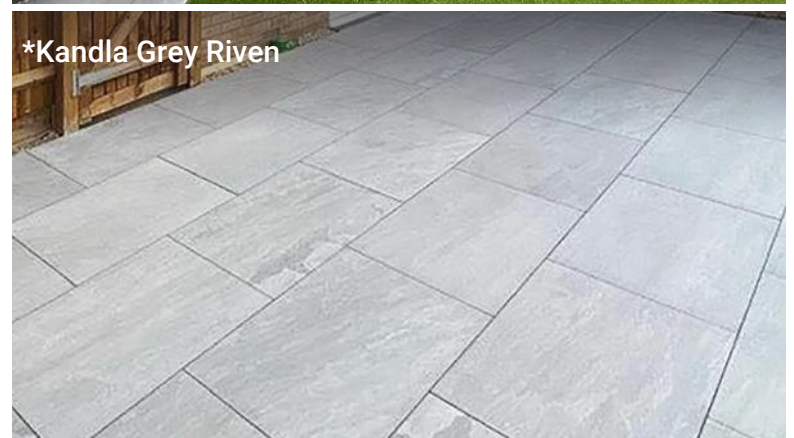

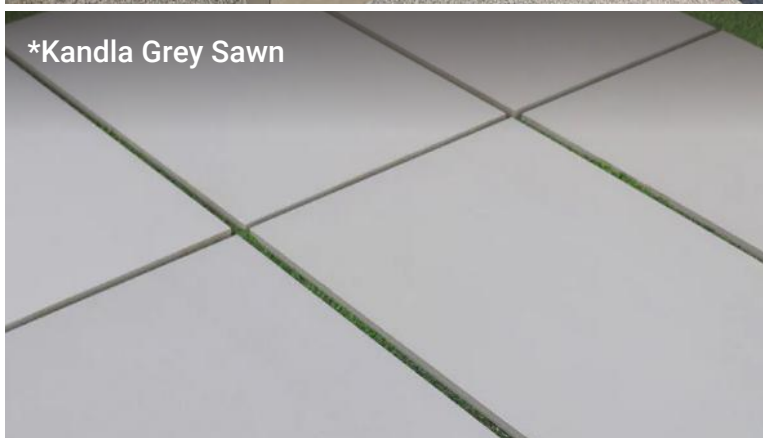

Imperial Steps
1200x400x50mm

Porcelain Paving

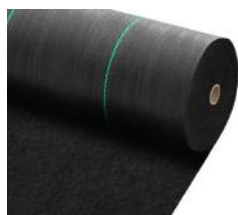

A remarkable alternative to natural stone paving, our high-quality porcelain paving tiles are exceptionally strong and require very little maintenance. Choose porcelain for long-lasting paving slabs and a paved space that won't require sealing and will still be frost, weather and acid-resistant.

Available in 600x900x20mm and 21.06m² project packs
*Only available in 600x900mm

Decorative Stones

Aggregates and gravels have a multitude of functional uses and look fantastic when used in the right setting. In contrast to using linear paving blocks, using aggregates or gravel in your garden will soften the look of your outdoor space. Bringing a natural texture to a design scheme, aggregates and gravels are tough and durable underfoot and work well in areas that need additional drainage.

Terram

ECCO GRAVEL

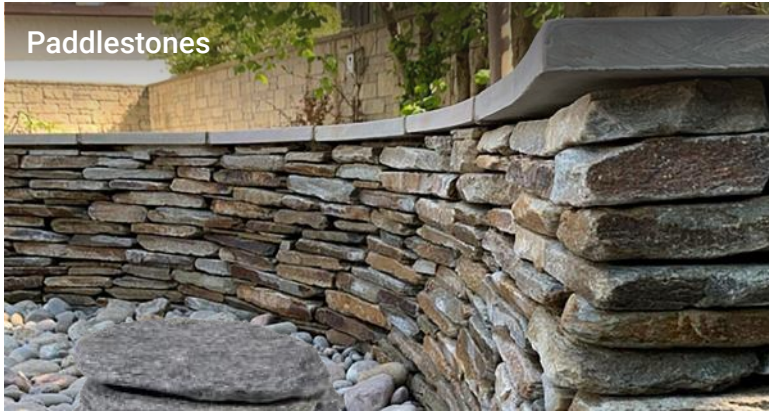

ECCO PRODUCTS

Keep your gravel footpaths and driveways looking neat and level with ECCO gravel. The innovative fitted honeycomb structure will firmly hold your loose aggregates or gravel in place, ensuring that your path or driveway has a supported and even surface – making it more user-friendly for people and vehicles.

Natural Stone Walling

Whether you're looking to split a steeply sloping garden into levelled areas, build an attractive retaining wall, shape a raised flowerbed or assemble a seating area, a natural stone wall will beautifully complement its surrounding landscape.
