

ECCOgravel & Golden Flint

Contractor: **Spring Landscapes**

Case Study

Materials supplied:
ECCOgravel40 & Golden Flint 14mm

For this project over in Ireland the client wanted the natural look of gravel but without the issues that tend to come with it, ie pitting, puddling, gravel displacement, so she opted to use the mighty ECCOgravel stabilisation grid around the entire exterior of the house.

Golden Flint 10mm was used to fill, giving a warm and inviting look and for the front doorstep the customer has used our Silver Grey Granite Paving and matching Bullnosed Steps.

The products really do complement this stunning property.
