Welcome

Over 40 years of supplying natural stone!

2018 marked forty successful years of trading for CED Stone Group, a milestone that we're very proud of reaching as a family business.

For over forty years, CED has worked hard to stay at the forefront of the landscape industry and fulfil the needs of an ever-changing market by continuing to deliver industry leading service, products, knowledge and advice.

Whether you're a Garden Designer creating a beautiful outdoor space, a Landscape Architect developing a new town centre, a Landscape Contractor building a new scheme or a homeowner looking to lay a new patio, our experienced teams will work with you to select products that will look exquisite and stand the test of time.

We continue to offer our customers the most varied, extensive and ethically sourced range of natural stone products, stocked across our six nationwide depots and are honoured to be trusted by some of the world's most innovative Designers.

We see our materials showcased at some of the most prestigious horticultural events in the world, such as the RHS Chelsea Flower Show, RHS Hampton Court Palace Flower Show and BBC Gardener's World Live to name a few and our products are used in projects all over the UK, from the Highlands of Scotland, to the promenades of England's south coast towns, with some high profile schemes in 2019 such as The Natural History Museum, and even the All England Lawn Tennis Club in Wimbledon! In fact, we are now making a splash in the USA, our North American office recently winning a Pinnacle Award for the Drexel Square scheme, in Philadelphia.

We will continue to ensure that our clients can develop ground-breaking landscape concepts by providing them with the interesting, unusual and amazing products, and support the UK's landscaping industry by offering our knowledge and advice along the way.

The creative concepts that can be achieved with our extensive range of stocked products is almost limitless, so we hope that this new and updated brochure will be an invaluable source of inspiration for you. If what you really want isn't here, don't worry - we offer a range of bespoke masonry services which can give you more options, so no matter how imaginative your ideas are, we can turn them into a reality.

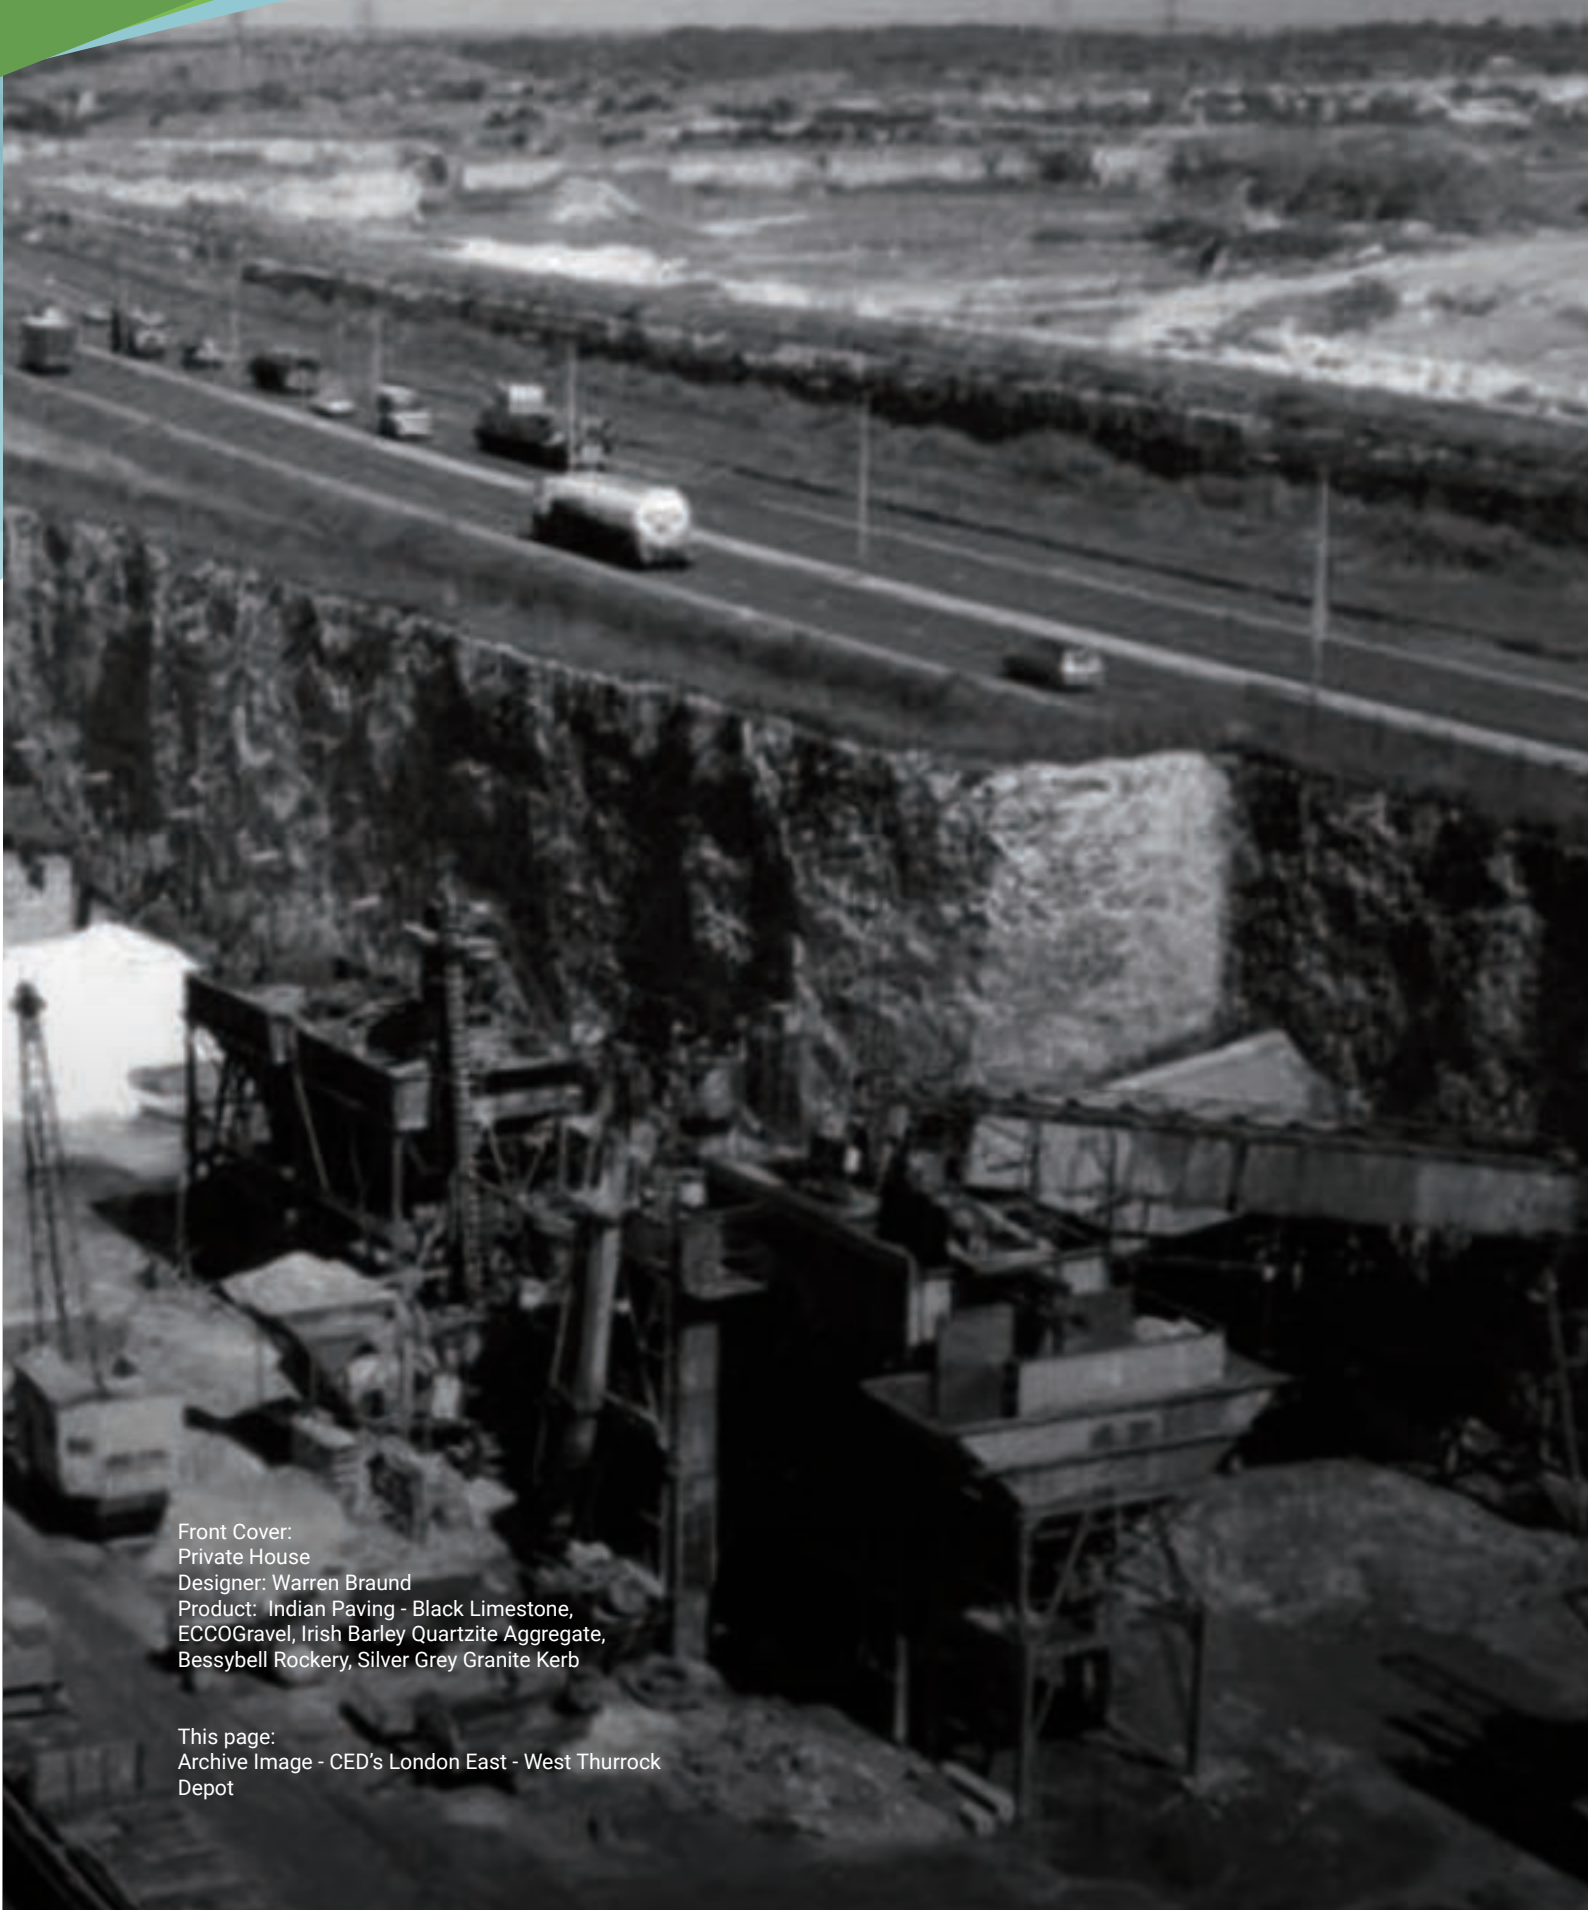

Here at CED Stone Group we know the environment is everything we depend on. As with all businesses, we have a legal duty to conduct business activity in a manner that protects it. We realise it's not just a legal duty but also a moral responsibility and we are committed to improving our working processes and habits to conserve and protect the environment. To find out just what steps we are taking to reduce our impact head to our website.

Finally, we would like to give thanks to all our employees, industry friends and stakeholders who continue to support us, and to our brilliant customers, who continue to trust us to source quality materials for their landscaping projects.

On that note, I hope that you enjoy this brochure and we look forward to seeing you.

Best wishes,

Our Products

At CED Stone Landscape, it's not just the expertise and knowledge of our people that make us stand out, it's also the extraordinary range of specialist natural stone and hard landscaping products that we have to offer.

We continue to source and develop new materials to meet the needs of an ever-changing market, so no matter what you're looking to create, we're confident that you can find everything you need here in our comprehensive brochure of stocked products. If not, then we will always do our best to use our industry knowledge to find it for you.

From our expertise, we know that natural stone can vary to a degree, some more than others. This is why we always aim to guide our clients to the best products for their projects, using our understanding of how the material will perform in different circumstances, their technical abilities and the intended use.

If you are unsure of anything, or would like any advice, contact your local CED Stone Landscape team using the phone numbers on the back cover of this brochure or e-mail us at: enquiries@cedstone.co.uk

For commercial projects, please contact the CED Stone Commercial division at: estimators@cedstone.co.uk

Section 1

Stone Paving

Beautiful landscapes require beautiful paving, and at CED Stone Landscape, we have one of the widest selections of stone and porcelain paving products to choose from.

With a wonderful variety of sawn and riven stone paving available, along with our popular porcelain paving, you'll be able to find a product that will perfectly suit your outdoor space.

Whether you are looking to create a traditional or contemporary design scheme, we have a range of colours and styles available.

We are also proud to introduce our collection of natural stone paving carefully sourced from quarries across the British Isles which you can find on page 18.

If you require any further information about our natural stone or porcelain paving products, please contact a member of the team.

Sawn

Achieve a sleek, sophisticated outdoor space with our range of sawn paving.

Ideal for use in modern and contemporary landscape designs, the clean lines and attractive colours of our sawn and textured paving will perfectly complement a more minimal, streamlined style.

For many sawn materials, it is common practice to texture the surface by either bush-hammering, flame-texturing or sandblasting, which increases the paving's slip resistance. Most of our sawn paving can be produced in any size to order. Speak to a member of our team who will be happy to arrange this for you.

Monarch

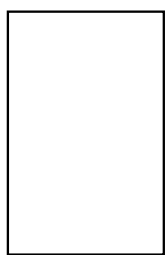

Product Description

The Monarch Range brings together the refined beauty of Egyptian Limestone, the understated elegance of Moleanos Limestone, and the striking character of Banded Gneiss.

This harmonious blend of three exceptional stones offers a bright, clean aesthetic that enhances both modern and traditional outdoor spaces. With its smooth textures, subtle tonal variation, and naturally durable composition, the Monarch Range delivers a timeless, sophisticated finish.

This range is available as sawn and textured paving, setts, coping and steps.

Imperial Range

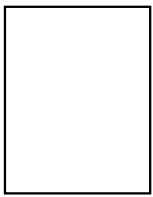

Product Description

Our Imperial Range is an unrivalled selection of the highest quality granites and basalts.

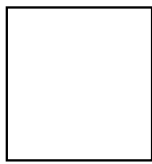

Renowned for being exceptionally strong and durable, these igneous stones are ideal low-maintenance materials for driveways, garden patios and paths. The wider variety of minerals present creates a rich and diverse palette, ranging from light-greys to deep pinks.

The speckled and peppered patterns are even, often resulting in a consistent look. The Imperial range is available as sawn and textured paving, setts, coping, edging and steps.

Riven

Stone paving slabs with a natural 'riven' surface are made by splitting the stone, allowing the flag to break along the material's natural layers.

Using this traditional splitting technique creates paving flags with a beautifully rustic texture on the surface. Our riven paving flags are available in a wide variety of materials, each with its own unique colour, texture and technical properties. Explore an exciting range of sandstone, limestone, yorkstone, slate and more.

Indian Sandstone & Limestone

Product Description

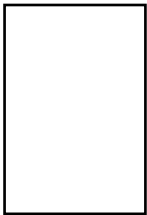

Our Indian Riven range is a beautiful collection of split sandstones and Black Limestone. These slip-resistant materials have a traditional riven surface, giving a natural finish. Indian Sandstone offers warm, earthy tones with natural variation, while Black Limestone provides a sleek, contemporary look with deep charcoal shades.

Ethically sourced from India, these riven flags are available in single sizes or as a range of sizes as a project pack.

Indian Sandstone and Limestone is available as riven paving, setts and coping.

Please note: The Black Limestone will fade to grey over time.

Italian Porphyry

Colour

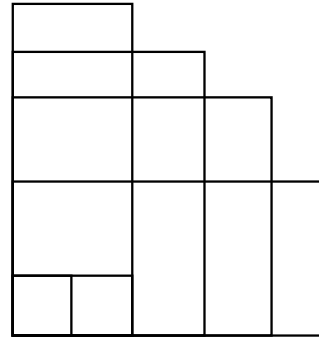

Product Description

Porphyry is a high-quality material commonly used across Europe. The predominant colour is a burgundy-violet shade, however, the stone's distinguishable mix of shades will also range from mid-greys and green-greys through to a burnt orange, giving Porphyry paving a delightful and classy multi-coloured palette.

An incredibly durable and strong material, Italian Porphyry is ideal for a low-maintenance paving project. Due to the mix of darker colours, Porphyry hides dirt and doesn't tend to show stains like coffee, wine or oil.

We stock split-sided paving, whilst sawn-sided paving is available to order from Italy within a few weeks. Our Italian Porphyry paving works particularly well when combined with Italian Porphyry setts, which are often used together in more traditional paving schemes.

Slate

Colour

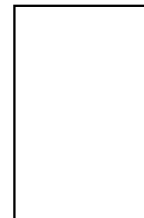

Product Description

Slate is a fantastic paving choice for both traditional and contemporary landscape designs. Depending on the style you choose, slate is a very versatile material and can be used for both internal and external projects.

Our slate paving has a riven surface, but with a slightly smoother finish when compared to other riven materials, such as sandstone. This gives Slate paving a more contemporary feel.

Hard-wearing and solid with a natural slip resistance, each paving slab has sawn sides. A perfect paving material for pathways, garden patios, pool surroundings and internal flooring.

Sizes (mm)

Kavala Quartz

Colour

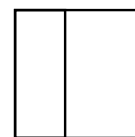

Product Description

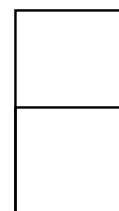

Kavala Quartz paving is a striking green/blue-grey schist from the Kavala region of Greece, combining timeless character with contemporary elegance.

Featuring riven surfaces, hand-cut edges, and random sizes, it creates the authentic look of traditional flagstone while offering exceptional strength and durability.

Sizes (mm)

Crazy

Crazy paving is a style of hard landscaping that uses irregularly shaped pieces of natural stone laid together in a free-form pattern.

Crazy paving creates a bespoke, natural look that works equally well in traditional and contemporary landscapes. Its organic layout adapts easily to curves, levels, and irregular spaces, blending seamlessly with planting.

Irregular stones can also be used as stepping stones, forming informal pathways through lawns, gravel, or planted areas while maintaining a strong connection to the landscape.

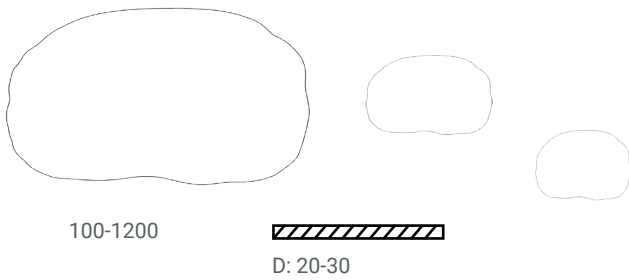

Crazy

Product Description

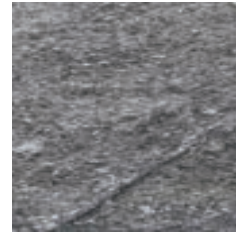

Crazy paving offers a timeless, natural look that brings character and individuality to any outdoor space. This versatile range includes Grey and Yellow Paddlestones, Donegal Quartzite, Caithness, Slabby Sandstone and Antique Filletti – each selected to create a beautifully rustic finish full of texture and variation.

Every stone features a naturally riven surface, providing excellent slip resistance while enhancing the organic appearance of the paving.

British Isles

Celebrate the very best stone materials, sourced from across England, Ireland and Scotland.

The UK and Ireland have some of the most beautiful natural stone resources in the world. We have worked hard to make the best ones available for our customers to use in their landscaping projects.

We're passionate about supporting British quarries and want to inspire the rest of the landscaping industry to use these beautiful materials.

This exceptional collection brings together the best stone from quarries across the UK and Ireland. Selected for their high-quality properties and incomparable style, these materials will bring a unique look to your outdoor space.

Please note: Our British Isles paving range is not held in stock, please contact us for availability and lead times.

English Collection

Sawn Yorkstone

Buff Yorkstone

* Buff Grey Yorkstone

Sizes (mm)

W: 600

L: Random

D: 50

D: 63

Available on request

Product Description

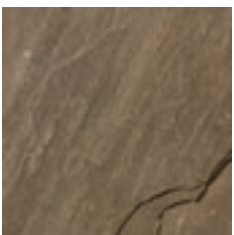

Acknowledged worldwide as one of Britain's most renowned natural stones, Yorkstone is a true classic. Neutral tones, earthy textures and exquisite pattern variations blend together in one of the most iconic and timeless paving materials, which has been used for hundreds of years due to its durable and hard-wearing qualities.

Diamond sawn on all six sides, its clean lines, crisp surface and strong technical attributes make Yorkstone paving an ideal choice for beautiful gardens and public spaces with heavy pedestrian traffic.

* Our Sovereign Tudor Sandstone offers a close alternative to Buff Grey Yorkstone see page 10 for details.

Riven Yorkstone

Colour

Product Description

Riven Yorkstone paving slabs have a naturally hand-split riven surface with split sides, making them an ideal choice for rustic garden styles.

This well-known and iconic sandstone has been used for centuries due to its durable and hard-wearing qualities. Riven Yorkstone paving is perfect for creating cottage garden patios and classic country paths.

We source our Yorkstone from the best British quarries, so you can rest assured that you are using the finest quality product in your project.

Slabby Sandstone

Colour

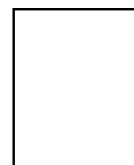

Product Description

Sure to bring a rustic character to any outdoor space, our Slabby Sandstone is sourced from the North of England.

Often used as an alternative to the more classic Yorkstone, Slabby Sandstone has a wonderful reclaimed look and will effortlessly blend into your landscape as if it has always been there.

Irish Collection

Donegal Quartzite

Colour

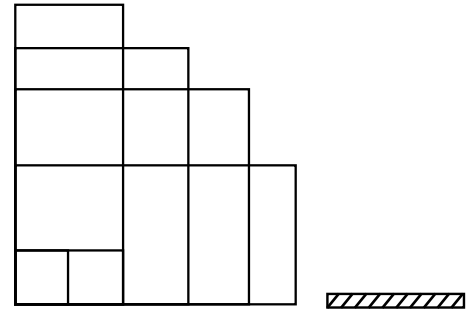

Product Description

Donegal Quartzite is a stunning blend of warm golden-brown hues with buffs and silvery greys. The colours intensify when wet, creating an even more varied and multi-coloured effect. When dry, sunlight causes the paving to sparkle as light bounces off the minerals on the stone's surface.

Available with a natural riven surface, the gently yet slip-resistant texture makes Donegal Quartzite ideal for swimming pool surrounds and spas. It is an attractive stone that also looks perfectly at home on a pathway, driveway, garden patio, marketplace or streetscape.

Please note: We would recommend allowing a 6-8 week lead time for this paving.

Kilkenny Limestone

Colour

Stone Washed

Product Description

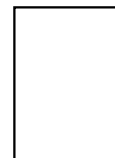

Formed around 350 million years ago, at a time when Western Europe was under a shallow tropical sea close to the equator, Kilkenny Limestone is a beautiful conglomeration of stone and fossil fragments.

The stone is a dark steely-blue colour with fossil fragments, mostly light grey bivalves (sea shells) and dark blue-grey crinoid stems (sea lilies).

Kilkenny Limestone is available in stone-washed and flame-textured finishes, both of which will give a beautiful and distinct aesthetic to your residential property or streetscape.

This product is also available in steps, kerbs, coping and setts.

Scottish Collection

Whinstone

Colour

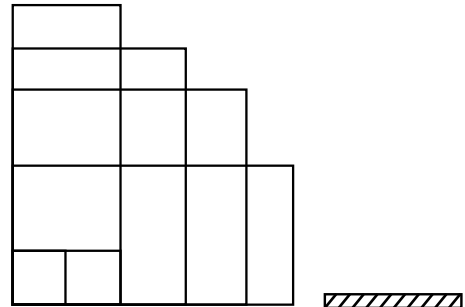

Product Description

A classic stone that has been used across Scotland for centuries. Formed during the Carboniferous period Whinstone paving is prized for its deep, natural colouring and subtle tonal variation. Typically featuring rich shades of charcoal, blue-grey and muted graphite.

Sourced from Central Scotland, it's a very popular stone to use for kerbs due to its strength and durability, but Whinstone paving and setts are also a stylish choice for contemporary landscape schemes.

Please note: We would recommend allowing a 8-10 week lead time for this paving.

Grampian Granite

Colour

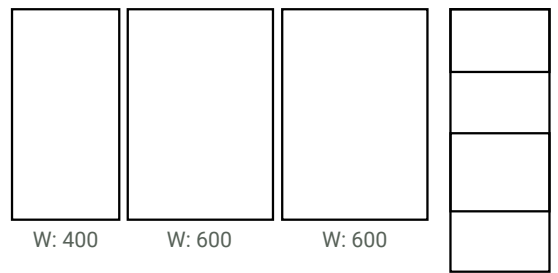

Product Description

An attractive granite extracted from the North East of Scotland. Grampian Granite is a highly durable material that's ideal for both commercial and domestic projects.

Consisting of Quartz with various Feldspar minerals and smaller quantities of Biotite Mica, Grampian Granite was intruded into the surrounding rock layers approximately 450 million years ago. Grampian Granite paving is characterised by its richly varied, natural colour palette, combining soft greys with warm buffs, pinks and subtle brown tones.

Green Schist

Colour

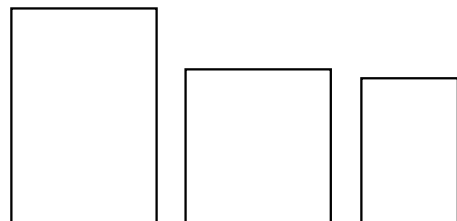

Product Description

Green Schist paving is known for its rich dark green colouring, with subtle blue-grey and deeper forest tones that create natural movement across the surface.

This metamorphic stone from Scotland's West Coast pre-dates complex life and has been shaped by immense heat and pressure, elongating the minerals and giving it a distinctive waved appearance. The result is a characterful paving with a unique colour and texture that suits both contemporary and traditional landscapes.

Norse Stone Ltd is a specialist natural stone company based in the north of Scotland, renowned for producing high-quality Caithness flagstone directly from their own quarries in the Scottish Highlands. From extraction and processing to bespoke cutting and finishing, they deliver durable and beautiful stone products for architecture, landscaping, interiors, and bespoke design projects across the UK and beyond.

With a commitment to craftsmanship, sustainability, and personalised service, Norse Stone blends traditional expertise with modern production to bring authentic Scottish stone to life in every project.

CED has been supplied by Norse Stone since their establishment in 2016, and as mutual lovers of natural stone, we're equally delighted to offer this high-quality, beautiful Caithness stone paving across all our nationwide depots.

Please note: We would recommend allowing a 6-8 week lead time for this paving.

Caithness

Colours

Product Description

Caithness stone is recognised for its distinctive surface texture, characterised by small dents, bumps, levels and craggy details that create a naturally gnarled appearance. On closer inspection, subtle silver sparkles catch the light, adding depth and quiet visual interest to the paving.

Renowned for both durability and character, Caithness has been used worldwide in projects ranging from large city-centre developments to private residential spaces, offering a timeless finish suited to a wide variety of landscapes.

Porcelain Paving

You'll find it hard to tell the difference between our porcelain paving tiles and real natural stone paving flags!

A remarkable alternative to natural stone paving, porcelain paving is now a highly popular replica to use in landscape design. Porcelain paving is an exceptionally strong and high-quality material that requires little maintenance.

While still being strong and durable, just like real natural stone paving, our porcelain ranges are incomparable in terms of style and practicality. With a very low water absorption, common paving issues are no longer a concern. Porcelain paving is frost, weather and acid resistant and won't require any sealing. Enjoy creating luxurious, lighter-coloured paved spaces that are easy to clean; even spots of grease or red wine spills can be easily wiped away.

With so many different colours and styles available to choose from, you're sure to feel inspired!

Porcelain Paving

Porcelain paving brings contemporary style and lasting performance to outdoor spaces.

Expertly manufactured for strength and precision, these premium slabs offer a sleek, modern finish with exceptional durability. Non-porous and highly resistant to stains, moisture, and fading, porcelain paving is easy to maintain and built to withstand the elements year after year.

Available in a wide range of colours, textures, and natural stone effects, porcelain paving delivers the beauty of stone with the practicality of advanced materials—perfect for patios, pathways, and entertaining areas where style meets everyday living. With so many different colours and styles available to choose from, you're sure to feel inspired.

Section 3

Setts

These little blocks of stone may be small, but they are not to be underestimated - setts are brilliantly strong paving materials that can last for hundreds of years!

Almost indestructible, setts are used to make hard-wearing surfaces for roads and pathways, but they are also used for their aesthetic qualities and can be laid into lovely and varied patterns.

Setts are highly versatile and can be used for just about anything, including fine detailing, edging, and even walling! Lay them in patterns to create driveways and pathways, or use them to complement more complex paving schemes by combining with paving flags or stone circles. Mix the shades to create different multi-coloured patterns or keep things looking smart with one colour.

Riven, cropped and tumbled setts will have a rustic and aged look, while sawn and textured setts will create a sleek and contemporary aesthetic. With an extensive range to choose from, endless looks can be created!

Most standard sett dimensions are readily available from our CED Stone Landscape depots, but all setts can also be produced in smaller sizes from stock, or we can arrange for larger bespoke sizes to be made if required.

Cropped	34 - 37
Riven	38 - 41
Sawn	42 - 44

Tumbled

Versatile and hard-wearing, Tumbled Setts perfectly imitate the aged and rustic look of reclaimed materials.

While the innate beauty of genuine reclaimed materials is indisputable, it's not always the most suitable choice for some landscape projects.

Tumbling is a technique in which stone setts are mixed together to break away the edges and wear them down giving the setts a wonderful weathered look. Tumbling can create a truly charismatic style that would authentically take hundreds of years of use to achieve naturally.

Harmonising with more traditional and country landscape styles, Tumbled Setts will bring a softer aesthetic to your landscape. We have a range of materials and colours on offer for you to choose, from a deep grey basalt to a beautiful grey-pink granite.

Grey Pink Granite

Red Porphyry

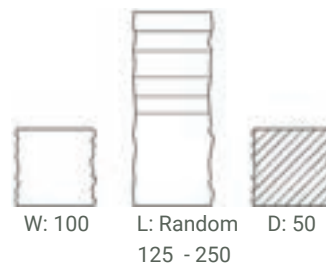

Black Basalt

Product Description

Developed to look remarkably similar to reclaimed setts, Temple Setts have sawn and textured tops, sawn bottoms and cropped sides. The setts are artificially aged using a tumbling technique which wears down the edges. While they look old and worn, Temple Setts still have a flat, low-trip-hazard surface, making them ideal for disabled access areas or spaces that will be used by prams or bikes.

Available in seven colours, Temple Setts have standard depth dimensions, making them far easier to lay than traditional reclaimed setts. For multi-coloured schemes, Temple Setts can be ordered in any mix or ratio of colours and materials. Additional sizes are available to order on request.

Cropped

Cropped setts have been used as paving materials since the Roman times.

Cropped setts are perfect for creating a rustic and aged look, whilst providing a highly slip-resistant surface.

All sides of these setts are cropped, creating a more traditional aesthetic. They are ideal for use in paths, driveways and edgings as well as market-places and streetscapes .

With an extensive range to choose from, endless looks can be created! Most standard sett dimensions are available from our CED Stone Landscape depots but, all setts can be produced in smaller sizes from stock, or we can arrange for larger bespoke sizes if required.

Granite Setts

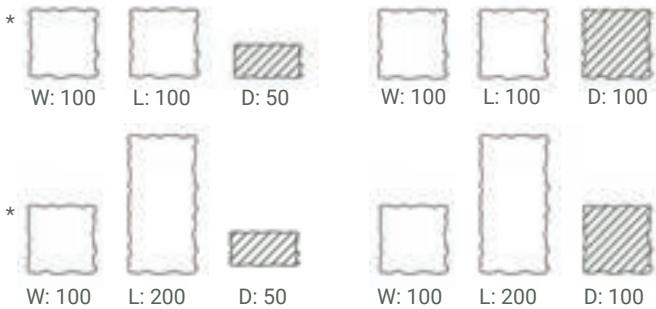

Product Description

Granite and Basalt Cropped Setts are extremely durable, ideal for use in paths, driveways and edgings as well as market-places and streetscapes.

Due to the nature of the stone materials, Medium Grey Granite and Pink Granite Cropped Setts have flatter surfaces and are therefore more suitable for walking areas. Our Yellow Granite Cropped Setts have a larger grain, so have a less consistent pattern and a rougher surface when split.

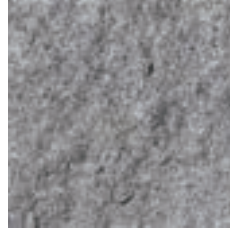

Our cropped setts come in a particularly wide range of sizes, so you can create a variety of paving looks, styles and patterns. For example, our Silver Grey Granite Cropped Setts are available in five stocked sizes, so the possibilities are endless!

Italian Porphyry Setts

Colours

Multicolour

Product Description

Porphyry is a high-quality material commonly used across Europe; setts can typically be seen in the sun-drenched Italian Piazzas and streets, laid in arch or fan patterns. The predominant colour of Italian Porphyry is a burgundy-violet shade. The stone's distinguishable mix of shades usually ranges from mid-greys and green-greys through to a burnt orange, giving Porphyry paving and setts a delightful and classy multi-coloured palette.

Lay them in patterns to create driveways and pathways, or use them to complement more complex paving schemes by combining with paving flags or stone circles. Mix the shades to create different multi-coloured patterns or keep things looking smart with one colour.

Riven

Setts with a 'riven' surface have been split apart, creating a beautiful uneven texture that follows the material's natural layers.

Due to the rough and unrefined texture of their surface, our highly slip-resistant Riven Setts will give a homely, traditional feel to your outdoor space.

With a natural variation in colour, these setts have an aged feel, providing your design with an authentic, rustic style.

Product Description

Kavala Quartz setts offer a striking blend of natural colour and texture, featuring cool blue-grey tones with subtle hints of green, silver and warm earthy shades that vary beautifully from piece to piece. The naturally riven surface enhances grip underfoot while highlighting the stone's layered character, creating movement and visual depth across the paving.

Ideal for pathways, borders and feature areas, Kavala Quartz setts bring a timeless, rustic feel that pairs effortlessly with both traditional stone paving and more contemporary landscape designs.

Indian Sandstone & Limestone Setts

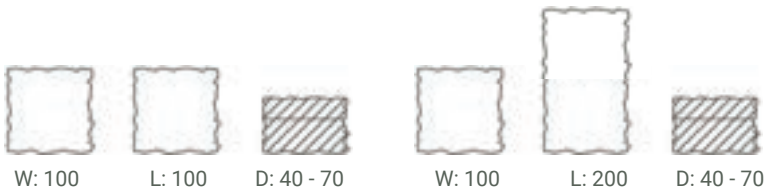

Product Description

Our Indian Riven stone setts include a beautiful selection of split sandstones in beige, green and grey tones, alongside a rich Black Limestone, offering a versatile palette to suit a wide range of landscape styles. Each sett features a traditional riven surface that enhances slip resistance while creating an authentic, natural finish full of texture and character.

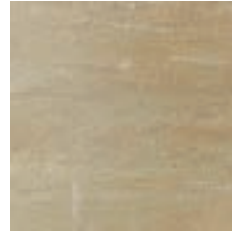

Ethically sourced from India, these durable materials combine timeless appearance with practical performance, making them ideal for pathways, edging details and feature paving where a rustic yet refined look is desired.

Please note: The Black Limestone will fade to grey over time.

Sawn

Achieve a sleek, sophisticated outdoor space with our range of sawn setts.

Ideal for use in modern and contemporary landscape designs, the clean lines and attractive colours of our sawn and textured setts will perfectly complement a more minimal, streamlined style.

For many materials, it is common practice to texture the surface by flame texturing, bush hammering or sandblasting, which increases slip resistance.

Most of our sawn setts can be produced in any size to order. Speak to a member of our team who will be happy to arrange this for you.

Imperial Setts

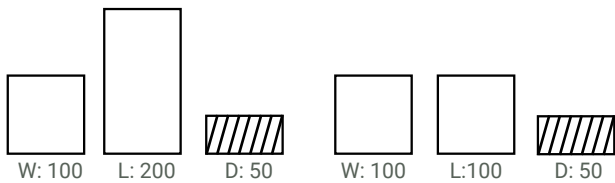

Product Description

Our Imperial Range is an unrivalled selection of the highest quality granites and basalts. Renowned for being exceptionally strong and durable, these igneous stones are ideal low-maintenance materials perfect for driveways, garden patios and paths. The wider variety of minerals present creates a rich and diverse palette, ranging from light-greys to deep pinks. The speckled and peppered patterns are even, often resulting in a consistent look.

The Imperial range is available as sawn and textured paving, coping, edging, setts and steps.

Section 4

Speciality Range

Stone steps and edging provide a practical and attractive finish for your project.

The strength and durability of natural stone makes it a very effective material to use for steps and edging. We have carefully selected a variety of high-quality stone materials which will ass the perfect finishing touch to your landscape design.

Our stone steps and edging are textured to provide the slip resistance needed underfoot and a stylish bullnosed profile ensures not only a practical finish but one that is aesthetically pleasing.

Products: Stone Edging - Blue Grey Granite &
Imperial Paving - Silver Grey Granite Paving

Speciality Range

Stone Edging

46 - 47

Steps

48 - 50

Stone Edging

Edging offers a complete finishing touch for driveways, paths, lawn perimeters, patios and borders.

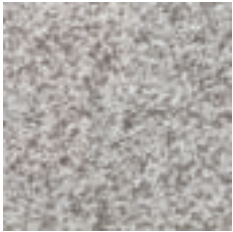

Edging is essential for preventing the escape of the laying course material from under paving and helps to create a tidy, finished look.

It can also help to retain loose aggregates or paving materials and acts as a barrier to inhibit plant growth and mulch migration.

Steps

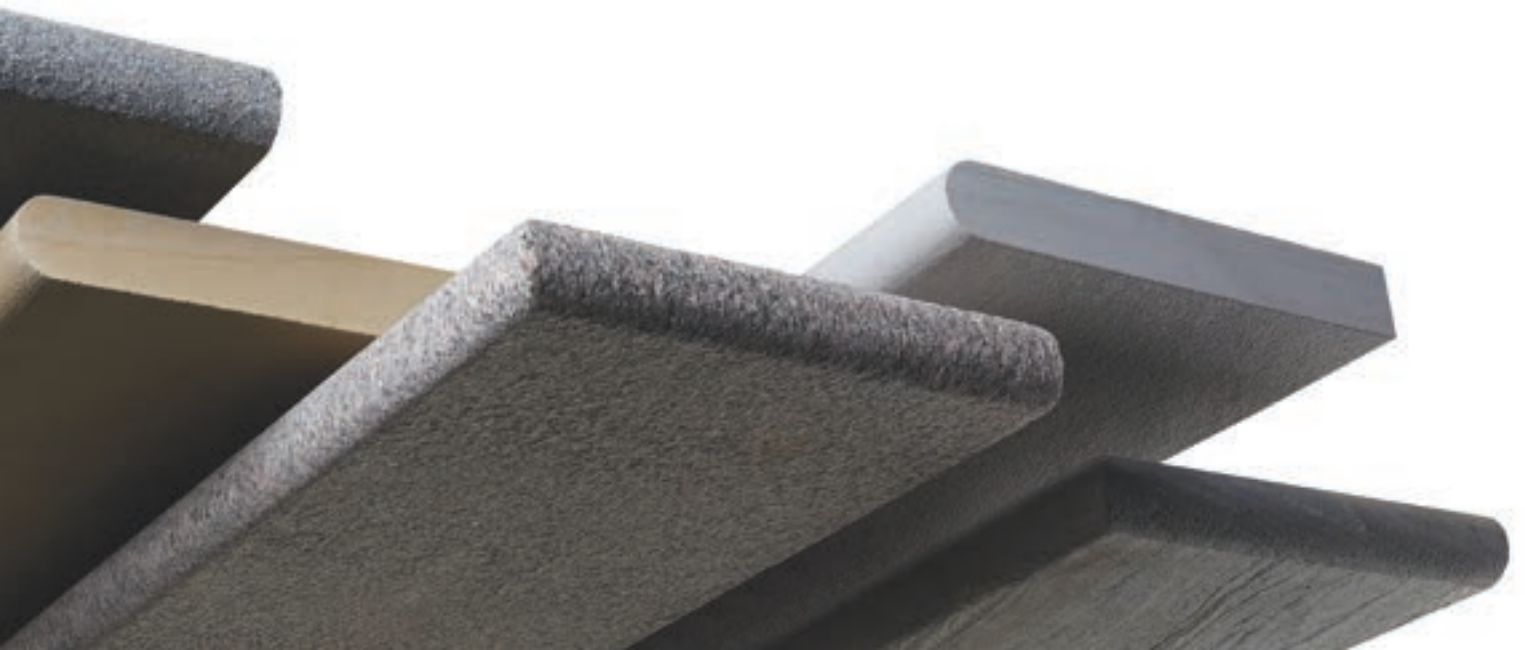

Our sawn and textured natural stone paving steps provide the perfect finishing touch to any garden or landscape area.

Meticulously cut from durable granite, basalt, sandstone and schist, these accessories are suitable for use wherever there is a change of level.

Held in stock in a variety of colours and finishes, all of our steps allow for a quick and easy installation. With a sawn and textured top surface and a full textured bullnose to the leading edge, our steps provide the perfect slip resistance needed underfoot.

Also available are matching end pieces, which will provide a neat finish on step corners and ends. Bespoke step sizes are available to order.

Speak to a member of the team to discuss your requirements.

Kerbs & Tactiles

Kerbs and Tactile paving play an essential role in public spaces and streetscapes, so they need to be exceptionally tough and durable.

Our kerbs and tactile paving are made from high-quality granites and basalts, which will readily endure heavy pedestrian use and withstand the burden of vehicular traffic.

Suitable for use in all kinds of landscaping projects from gardens and driveways to roads and streetscapes, these products will perform the job they are designed to do effectively and for many years.

If you require a particular stone for your project that we do not hold in stock, we can look at sourcing it for you.

Please contact your local CED Stone Landscape depot to discuss your project in more detail.

Contact information can be found on the back page, or you can email us at enquiries@cedstone.co.uk

Tactiles

54 - 55

Kerbs

All our kerbing products are available in a classic Silver Grey Granite.

Exceptionally tough and durable, granite has been used in the UK for kerbstones for centuries and is the ideal material to provide a long-lasting and attractive finish.

Road kerbs serve a number of purposes:

- Retain carriageway edges to prevent loss of the structural integrity
- Act as barriers between road traffic, pedestrians, or verges
- Provide physical 'checks' to prevent vehicles from leaving the carriageway
- Form channels to help drain away surface water

We hold a large quantity and range of standard kerb sizes in stock at all times. Granite kerbs can also be made to order in any size depending on your requirements, with a small edge rounding, chamfers, bullnosing, flame-textured surface or indeed many other finishes.

Made-to-order kerbs can normally be supplied to any specification within 8 -10 weeks. We are also able to source reclaimed kerbing for an aged and rustic look – take a look at page 68 for more information.

Straight Kerb

Colour

Silver Grey Granite

Product Description

Ideal for straight paths and roads, our Silver Grey Granite Straight Kerbs are sawn on all sides with bush-hammered tops and fronts, making them suitable for both public and private projects.

Available in a wide range of widths and depths, all our straight kerbs are reversible.

They are sawn with textured tops and sides, providing an excellent slip-resistant surface.

Dropper Kerb

Colour

Silver Grey Granite

Product Description

A Dropper Kerb is used when the height of a kerbing scheme needs to drop in order to allow easy access to the road, for example, at level crossings.

They are available with right-handed or left-handed drops when viewed from the carriageway.

Dropper Kerbs can also be used as transitions between different kerb profiles.

Radius Kerb

Colour

Silver Grey Granite

Product Description

A bend in the kerb line is known as a 'radius', and all bends, curves and arcs are created by using one or more 'radii'. Specially shaped to form precise and accurate curves of various degrees, our Radius Kerb is stocked in the same sizes as our Straight Kerbing, with six different external radii to choose from, depending on your design.

The radius of the kerb is measured from the centre of the "circle", to the finished (or visible) face.

Quadrant Kerb

Colour

Silver Grey Granite

Product Description

Quadrant Kerbs are used for creating neatly finished external corners and are manufactured to perfectly match our other available kerb profiles.

With a rounded, curved edge, Quadrant Kerbs are less damaging to vehicle tyres.

Tactile

Pedestrian safety should always be at the forefront of any public landscape project.

Tactile Paving has raised surfaces in different patterns and textures, and plays an essential role in public spaces and streetscapes.

Used on many footpaths, stairs, crossings, and train station platforms to assist blind and visually impaired pedestrians, Tactile Paving helps users to make sense of the space they are in, either indicating safe walking areas or drawing attention to potential hazards.

Our Tactile Paving flags have a sandblasted surface and are made from strong, high-quality granites and basalts.

With different colours available, you'll be able to choose the right product for your project.

Blister

Colours

Blue Grey Granite

Silver Grey Granite

Red Granite

Yellow Granite

Product Description

Blister Paving flags are laid next to dropped kerbs on the side of roads or pathways, helping to show pedestrians where the gradient change might be and indicating a safe place to cross a road. The top surface is sandblasted to create the 'blisters' which are easily felt underfoot by pedestrians who are blind or partially sighted.

Sizes (mm)

Stone Walling & Copings

Walling can be used in a variety of different ways in landscape design.

Whether you're looking to split a steeply sloping garden into levelled areas, build an attractive retaining wall, shape a raised flowerbed or assemble a seating area, a natural stone wall will beautifully complement its surrounding landscape.

A classic dry stone wall can be a truly beautiful addition to any outdoor space, whilst offering a safe home for plants, insects and wildlife. Our blocks of Slabby Sanstone or Paddlestones are ideal materials for building these low-maintenance stone walls.

Our range of walling products and coping stones comes in a variety of colours and styles, so we're confident that you will find the perfect product for your design.

Walling

Use natural stone walling to add character and distinction.

Use a classic stone wall to give natural beauty, character and distinction to your outdoor space.

We have a wide variety of high-quality stone walling options to choose from. From larger blocks of Slabby Sandstone to beautiful thin paddlestones, there's no limit to what you can potentially build.

Natural stone walls are exceptionally popular in the landscape industry, with people recognising the benefits of having a versatile, low-maintenance structure in their garden that offers a safe home for wildlife and plants too.

To neatly finish off the top of your wall and protect it from potential water damage, we offer a range of natural coping stones which you can find on page 65.

Gabion Fill

Materials

Limestone

Granite

Yorkstone

Product Description

With a good angular shape, these Gabion Fill are the ideal size to stack in mesh cages, therefore ensuring a strong and sturdy wall structure. While traditionally used in highway construction, designers and landscapers discovered that Gabion Walling was a versatile, frost-resistant and a budget-friendly option, which could be built with minimal time and effort.

A range of other products can also be used as decorative Gabion Fill, such as cobbles or setts.

All CED Depots also have access to locally sourced Gabion Fill such as basalt and quartzite, so it's worth enquiring if you're looking for something unique.

Paddlestones

Product Description

Perfect for traditional or contemporary gardens, Paddlestones are flat, roughly disc-shaped pieces with soft, rounded edges formed by extensively tumbling paving products.

With a very similar look to natural river-worn paddlestones, our Paddlestones are a sustainable alternative as they are not taken from rivers or beaches, leaving the environment unaffected.

With a bit of care and consideration in selecting the right shapes, it's easy to stack these paddlestones into rows to build a sturdy dry stone wall. Dry paddlestone walls are a particularly eye-catching focal point in any garden scheme, with small holes and cracks providing an ideal microhabitat for insects.

Kavala Walling

Sizes (mm)

100-400

D: 30-80

Product Description

Kavala walling stone brings a soft, weathered character to outdoor spaces, defined by its gently rounded profiles and naturally aged appearance. The elongated pieces display pale grey and off-white tones with subtle earthy markings, creating a light, calming palette that suits both contemporary and traditional garden designs.

Each stone has a tumbled finish that smooths the edges while retaining natural texture, allowing walls to feel organic and timeworn rather than uniform. Ideal for feature walls, raised planters and garden boundaries,

Rustic

Sizes (mm)

W: 100

L: 150-300

D: 60-80

Coverage

Approx: 4m²/Tonne

Product Description

Ideal for complementing traditional or rustic garden styles, these beautiful sandstone walling stones are naturally riven with split sides. They have been tumbled, which softens the edges to create an aged, worn appearance, allowing you to recreate the look of time-worn garden walls, built-in stone seating or raised flower beds.

Cathedral Walling works particularly well in an outdoor space when combined with our sandstone paving slabs. With two different colours to choose from, patterns can be created with rows of alternative shades, and additional sizes are available to order on request.

Slabby Sandstone

Product Description

Create the look of a traditional dry stone wall in your own outdoor space with our Slabby Sandstone walling. A blocky stone with particularly flat top and bottom surfaces, Slabby Sandstone is the ideal material to use for stacking and building, to get some height into your outdoor scheme.

Slabby Sandstone has an attractive, earthy-brown shade with some subtle orange and rust tones. Our Slabby Sandstone Walling is available in a range of different shapes and sizes, giving plenty of variety in order to build a strong wall with well-fitting and carefully considered layers of stone.

Knapped Flint

Product Description

Knapped Flint is a traditional walling material with a long heritage across the South East of England, used since Roman times and still widely seen in Sussex, Kent, Essex and Norfolk. Known for its durability and distinctive appearance, it is often chosen for restoring historic flint walls or creating new builds that blend seamlessly with existing architecture.

Our standard Knapped Flints are quarried from chalk beds, leaving a natural white chalk crust. Each flint is hand-split to reveal the glossy dark centre, typically laid facing outward to form decorative patterns, while occasional white faces add contrast. Suitable for use with lime or concrete mortar, we can also supply whole flints and varied quantities to suit individual project requirements.

Slips & Cladding

Crafted by industry specialists with a passion for providing high quality, cost effective and innovative products - Wild Stone is unique in both system and appearance.

Wild Stone is a complete, high performance system specially designed to face your project with natural or engineered stone. Created by industry specialists with a passion for providing high quality, cost effective and innovative alternatives to traditional materials.

▲ Products: Wild Stone Paneling - Champagne Quartz

Wild Stone Panelling

Product Description

Wild stone panelling is available in both real stone and engineered precast stone cladding panels. The real stone panels are made from split faced real stone whilst the engineered panels are manufactured using a process that replicates the existing colours and textures of traditional stone.

Both alternatives offer lightweight Z shaped panels designed for quick, easy installation on any surface. The choice of real or engineered is up to you - if you can notice the difference.

Coping Stones

Finish off your stone wall with one of our Natural Stone Copings, available in a range of Granites and Sandstone.

Coping Stones provide a stylish solution to top a wall and perform a vital protective role in preventing rain from reaching cavity walls or penetrating solid walls. Being flat, they can effectively level off your stone wall whilst ensuring an attractive and smart finish.

Available in a range of strong and durable materials to choose from, you're sure to find a coping stone that perfectly complements your project. Need a specific size? We're happy to cut your coping stones to fit your requirements. Just speak to a member of our team.

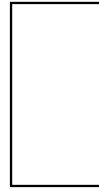

Coping Stones

Product Description

Our natural stone coping stones are designed to provide a refined finishing touch to walls, and raised features, combining practical protection with timeless style.

Crafted from high-quality natural stone, these copings help shed water effectively while enhancing the overall look of garden walls and architectural features. From the classic elegance of the Imperial and Monarch ranges to the characterful tones of the Sovereign and Indian Sandstone options, every piece showcases natural variation and durability.

Reclaimed Stone

Explore beautiful natural stone that has stood the test of time for hundreds of years.

Stone has a wonderful tendency to improve in appearance over time; many streets in our British towns and cities have been laid for hundreds of years with lumpy, worn cobbles and aged paving flags. These stones have been naturally weathered over years of use by crowds, market carts, wagons and stage coaches; so using reclaimed stone is guaranteed to bring a special and historic character to your landscape.

If a paving scheme needs to be replaced or taken up, the old materials are usually fully recyclable – making stone the ultimate sustainable product. Using eco-friendly stone materials doesn't mean that you have to forfeit style – there are many examples of granite setts or yorkstone flags in Britain that have been reused multiple times and look better now than when they were first laid a hundred years ago. Looked after properly, these products could easily last for another hundred years.

Reclaimed Stone

We have a fantastic range of reclaimed materials held in stock throughout our six depots. You can choose from setts in various colours and sizes, as well as paving flags and kerbs.

We regularly stock reclaimed granite and yorkstone items, which are always popular, but also reclaimed limestone, caithness, slate, portland and many more British materials.

Due to the nature of reclaimed stone, the availability of any one particular material cannot always be guaranteed. However, if you have a particular reclaimed stone, quantity, size, finish or colour in mind for your project, we will use our knowledge and expertise to track it down for you.

For this reason, we always recommend that you buy your reclaimed materials first before starting your project, ensuring that you avoid any delays while waiting for it to be delivered. You will also know the correct thickness of your reused stone, so you can correctly prepare your base. Once sourced from demolition or domestic projects, we sort and clean the reclaimed products, then deliver to site.

We've also been known to source reclaimed walling, dock edges, gate posts and copings. For all reclaimed enquiries, we'd recommend arranging a visit to one of our CED Stone Landscape Depots to discuss the different options in more detail with one of our experts.

▲ Kerbs

▲ Flags

Paving

Product Description

Reclaimed paving is a great product that can be used to incorporate some truly unique tones and textures into your design scheme.

We're committed to sourcing reclaimed paving slabs that not only have a traditional and period look to them, but also have the right durable and hard wearing characteristics – so you can be confident that your paved area will be of the highest quality for years to come.

Setts

Product Description

Beautifully worn and authentically aged, we usually source reclaimed setts from across the country in tough granites and whinstone.

After years of use in busy market squares and streets by generations of people, they are still strong and durable enough to be reused in order to bring an aged and rustic character to your own outdoor space.

Kerbs

Product Description

We're able to source reclaimed granite kerbing from a variety of places across the country.

Reclaimed kerbs are ideal for using in landscapes that need to have a historic feel, for example when an outdoor space needs to blend in with a period property, or replacing and matching older kerbing.

Special Items

Product Description

We've been able to help our clients source all sorts of wonderful and interesting reclaimed pieces.

Everything from dock edges, mill wheels, feature stones, gate posts and coping stones; these special items provoke a wonderful sense of nostalgia. We do try hard to find out where our reclaimed materials have come from, as many of our clients enjoy working with historic materials with a past and a story behind them.

Section 8

Aggregates & Gravels

We pride ourselves on having the widest range of decorative aggregates and gravels on the market, with a variety of shapes, colours and sizes available for you to choose from.

Using aggregates or gravels in your garden can soften the look of your outdoor space in contrast to using blocks of paving slabs. Bringing a natural texture to a design scheme, they are tough and durable underfoot and work well in areas that need additional drainage.

Being a versatile landscaping material, our aggregates and gravels have a multitude of uses. Not just ideal for laying on driveways and paths, you can also incorporate aggregates and gravels into water features, planting pots and borders.

For footpaths and driveways, our specially designed gravel stabilisation systems, ECCOgravel, will keep things looking neat and firmly hold your loose aggregates or gravel in place. Visit page 80 for more information.

Aggregates & Gravels

Aggregates and gravels have a multitude of functional uses, and look fantastic when used in the right setting.

We're proud to offer the widest range of aggregates and gravels on the market. From reds and pinks to soft buffs and striking greys, we've got them all. Our expert team will help you select the perfect aggregate or gravel for your scheme, ensuring that you can create an outdoor space that works for you.

When choosing your material, we suggest checking a sample when wet, as the colours can drastically change.

Don't forget, if you're looking for something more specific, come and speak with us – we are happy to use our resources to look for the right materials for you.

Blue Slate

An aggregate with a beautiful heather-grey colour, these slate chippings look stunning both dry and wet.

Sizes: 20mm & 40mm

Green Slate

A muted earthy green-grey tone when dry, the colour changes to a darker shade of green when wet.

Sizes: 20mm

Plum Slate

An aggregate with a warm plum-grey tone, these slate chippings take on a striking plummy-red shade when wet.

Sizes: 20mm & 40mm

Cotswold

A classic light-cream material, ideal for brightening up darker garden areas. Takes on warmer golden tones when wet.

Sizes: 20mm & 10mm

White Marble

A bright-white colour, these crushed marble chippings will make an eye-catching statement in your outdoor space.

Sizes: 20-16mm & 14-10 mm

Grey Limestone

With powdery light greys and mid-greys, this aggregate is ideal for when a consistently neutral shade is needed.

Sizes: 20mm & 14mm

White Limestone

Angular with a consistent white-grey shade. Perfect for when a lighter neutral shade is needed to complement a design scheme.

Sizes: 10mm

Buff Limestone

A neutral, light-taupe limestone that is perfect for adding a lighter shade to your garden or pathway.

Sizes: 20 mm

Colours

Black Basalt

A deep grey-black shade when dry, a naturally angular aggregate which turns to a solid black colour when wet.

Sizes: 14mm & 6mm

Meadowgrass Marble

A pale-grey marble gravel with icy white tones and flashes of green tints keeps a similar shade when wet.

Sizes: 22-14mm

Red Porphyry

With striking shades of light burgundy and violet, Red Porphyry takes on a deeper red colour when wet.

Sizes: 14-10 mm

Grey Green Granite

Grey in colour when dry, and a dark greenish grey colour when wet. Naturally angular in appearance.

Sizes: 20mm, 10mm & 6mm

Green Basalt

A green-grey aggregate consisting of an attractive blend of darker grey tones with speckles of white running through.

Sizes: 20mm & 10mm

Grey Whin

A warm golden cream gravel with some light grey tones, perfect for adding colour to your garden or pathway.

Sizes: 20mm & 10mm

Silver Grey Granite

A light silver grey colour when dry, with more prominent black speckles when wet. A favoured choice for Japanese Gardens.

Sizes: 20mm, 14mm, 10mm & 6mm

Golden Quartzite

One of our best-selling aggregates, a light yellow and gold colour when dry, and a darker amber colour when wet.

Sizes: 20mm, 10mm & 6 mm

Flamingo

Quartz pinks, whites and greys combine to make this attractive, light, multi-coloured mix.

Sizes: 20mm

Gravel Stabilisation Systems

ECCOGRAVEL stabilisation systems are ideal for keeping outdoor paths and driveways looking smart.

Gravel surfaces are very popular, but they have one major drawback – over time, the gravel can spread and scatter, resulting in an uneven and messy appearance.

Keep your gravel footpaths and driveways looking neat and level with ECCOgravel. The innovative fitted honeycomb structure will firmly hold your loose aggregates or gravel in place, ensuring that your path or driveway has a supported and even surface – making it more user-friendly for people and vehicles.

Everything is kept neatly in place inside the hexagonal cells, avoiding the common problem of spread, lost or scattered gravel.

With sheets in two different depths, you'll find it easy to choose the right solution depending on your intended use. Speak with our expert team today to discuss how ECCOgravel could make a difference to your gravel project and for guidance on which aggregates and gravels are suitable for use.

ECCOgravel sheets are the ideal solution for the construction of paths and driveways.

What key features make ECCOgravel so ideal?

- ✓ Low maintenance
- ✓ Very fast and simple installation – saving significantly on installation costs
- ✓ Low energy consumption during production
- ✓ Easy and effortless to walk on
- ✓ Geotextile underside inhibits weed growth; less herbicides
- ✓ Flexible sheets that are easy to cut into shape
SUDS friendly, allowing drainage – no additional drainage systems required
- ✓ 100% water-permeable surface; reduced flooding and ground water is replenished
- ✓ 100% recyclable polyethylene
Neutral sheet colour
- ✓ Wheelchair and pushchair friendly
Easy driving; no pits, ruts or puddles – ideal for driveways

With a honeycomb structure fitted onto geotextile sheets, ECCOgravel produces a firm gravel surface which is not only low maintenance but also Sustainable Drainage System (SuDS) compliant.

It is recommended not to use gravel types with a size of less than 4mm; finer gravels could stick to people's shoes or get between the profiles on the tyres of a car. For optimum compaction in the honeycomb, we recommend limiting the maximum diameter of the gravel to 14mm.

The sheets support the use of rounded pebbles and most decorative aggregates. Please see our Aggregates and Gravels on page 72.

▲ ECCOgravel

ECCOgravel30 or ECCOgravel40?

Choose the right product for your intended use. It's vital to think about how your gravel area will be used –consider what loads, traffic and people can be expected to walk or travel over the area.

ECCOgravel sheets have a very high compressive strength in an unfilled state. Allowing gravel to travel underneath the sheets should be avoided at all costs.

Each sheet is extremely lightweight, so no special lifting equipment is required, and the sheets can be easily cut into shape with a power or hand saw. Sheet sizes are 1.6m x 1.2m, they can be folded in half for easy transportation.

ECCOgravel30

Product Description

ECCOgravel30 is ideal for garden paths, terraces, bicycle paths, footpaths, sporting grounds and flat roofs.

With a height of 30mm, ECCOgravel provides the ideal solution for a firm gravel surface. It makes a gravelled surface more suitable for pedestrians, pushchairs and bikes.

ECCOgravel40

Product Description

ECCOgravel40 is ideal for driveways, low-speed access roads, car parks and emergency lanes.

With a height of 40mm, ECCOgravel40 can handle occasional heavy traffic; however, tight U-turns by trailers or similar vehicles should be avoided if possible. It makes a gravelled surface more suitable for pedestrians, pushchairs and bikes.

Section 10

Resin Bound Surfacing

Resin bound surfacing offers a seamless, modern finish that combines visual appeal with outstanding performance.

Created by blending natural aggregates with high-quality resin, this surface delivers a smooth, porous finish that allows water to drain naturally, helping to reduce puddling and surface water build-up.

Durable, low-maintenance, and UV-stable, resin-bound surfacing retains its colour and finish over time while withstanding daily wear. With a wide choice of aggregate colours and blends available, it's an ideal solution for driveways, pathways, patios, and commercial spaces—bringing clean lines, long-lasting quality, and contemporary style to any setting.

Please contact your local depot for more information on our Resin Bound Surfacing options.

Resin Bound

Resin Bound is the fastest growing surfacing application in the last five years. A stunning alternative to loose gravel, block paving or tarmac, this system is fully permeable, SuDS compliant, hard-wearing and low maintenance.

A highly versatile system, it can be applied easily to slopes, areas with limited access and intricate areas such as winding pathways. From small patios to large sweeping driveways, resin bound is ideal for any size of area, and an extensive selection of aggregates gives an enormous choice in colour for the creation of a truly unique, seamless, attractive, and durable resin surface. A resin bound system mixes natural aggregate and clear resin thoroughly together in a forced action mixer. Each particle of stone is fully covered in resin, then hand troweled immediately on to a base to a smooth, flat finish.

The resin bound system can be overlaid to existing or new concrete or tarmac, and because of the way it is mixed, small gaps between the aggregates make a permeable, SuDS compliant solution.

There is a huge variety of mixes and colours of aggregates available to use, so you can find the perfect resin option for your driveway, path, patio or other resin bound aggregate project.

Please Be Aware...

There is so much to consider when applying a resin bound surfacing system. It is important to understand how the resin works and reacts under different circumstances, the limitations of the weather, and the site conditions needed to produce the best results.

A comprehensive technical understanding of how to lay resin bound surfacing system is paramount.

Section 11

Footpath & Treepit Gravels

Giving exceptional compaction and quality, these gravels are perfectly suited for footpaths and treepits.

Our Golden Amber Footpath Gravel is a limestone-based product that will bring a naturally warm and golden finish to your outdoor space.

Alternatively, our renowned CEDEC Footpath Gravels are available in a range of colours and are suitable to lay in areas with a pre-existing ecosystem as they will not affect the pH value of the surrounding soil.

SuperCEDEC is best suited for use as a tree-pit gravel, although it can still be used on footpaths.

Please contact someone from the team before choosing a product, so we can use our expertise to help you to choose the best gravel for your intended project.

Footpath & Treepit Gravels

Footpaths have a multitude of purposes in landscape design; they lead, join, define and balance.

Perfect for areas with high impact and high pedestrian traffic, our selection of footpath gravels is sure to suit any requirement whilst still providing a natural appearance.

With smaller stones in a more graded range of sizes, these products have excellent compaction qualities, resulting in a supported surface to walk on.

Alternatively, you can make a supported footpath surface out of our gravels and aggregates listed in Section 8 by using our gravel stabilisation system, ECCOGravel. You can find more information on page 80.

While our CEDEC® range has been a popular product since the 1990's, there were awkward situations when it was not the ideal product to use. As a result, we developed SuperCEDEC®, which is more flexible and easier to compact, making it particularly suitable for treepits.

This product has the same natural appearance and permeability as CEDEC, but has a firmer compaction and slightly looser crumb on the surface. Both CEDEC and SuperCEDEC footpath gravels are made from granite and quartzite materials, which will not affect the pH value of the surrounding soil and cause damage to growing trees.

▲ Contractor: Waterston Landscapes - Products: CEDEC Footpath Gravel - Red

CEDEC & SUPERCEDEC®

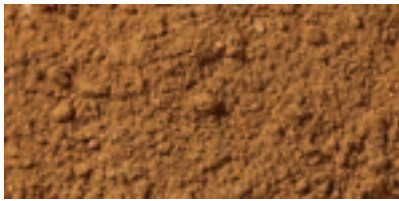

Red

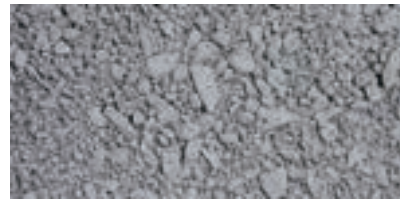

Gold

Silver

Bronze

Grey

Product Description

CEDEC Footpath Gravels form a firm but porous structure that retains moisture while allowing any excess water to flow through.

CEDEC's combination of different graded aggregates creates a firm, packed surface with approx. 25% compaction, which is still porous and retains moisture due to its reduced clay content.

Made from granite or quartzite, CEDEC is tree-friendly and does not affect the soil's pH balance.

The permeable nature of SuperCEDEC, combined with its more stable structure make SuperCEDEC ideally suited for use in urban tree-pits and footpaths.

Like CEDEC, in order to function effectively, SuperCEDEC needs to be used and rained upon. However, it will also function under cover if watered.

After compaction, coverage of CEDEC footpath gravel, is approximately 10m² per tonne at 50mm thick, compaction being about 25%.

So, to compact to 50mm, an initial non-compacted layer of 65mm is required.

Full laying instructions are available on our website.

After compaction, coverage of SuperCEDEC, either in tree pits or as a footpath gravel, is approximately 10m² per tonne at 50mm thick, compaction being about 25%.

So, in order to compact to 50mm, an initial non-compacted layer of 65mm is required.

Golden Amber

Product Description

Consisting of selected limestone graded from 14mm to fine particles, this product has a high content of naturally occurring marl, which results in exceptional self-binding properties and a non-porous surface. Because Golden Amber Footpath Gravel is limestone-based, it can affect the pH levels in the soil.

Hoggin

Product Description

Hoggin is a well-graded gravel consisting of a precise mix of clay, sand and gravel. The clay acts as a binder and helps to form an effective, very stable surface when Hoggin is compacted. This makes it only slightly permeable, allowing most rainfall to run off the surface, making it a great material to use for footpaths.

Cobbles & Pebbles

Cobbles and pebbles can serve a multitude of uses within your garden or open space, including both decorative and functional uses.

With a striking range of colours and patterns available in a variety of different sizes, you are sure to find something to match your budget and project requirements.

Use cobbles and pebbles decoratively within a plant pot, or take advantage of their exaggerated colours when wet by placing them strategically within a water feature.

Alternatively, use our natural stone cobbles and pebbles to mulch the soil around your plants to provide a neat and tidy appearance. Choose a colour to create a vivid contrast or choose a more subtle, earthy tone – the options are endless.

Cobbles & Pebbles

Here at CED, we're passionate about bringing unique and unusual materials to the market, which is why our customers come back to us again and again.

We have one of the widest collections of high-quality cobbles and pebbles on the market, offering an extensive range of colours and sizes for you to choose from.

With so many beautiful options available, you're sure to find the perfect stone product for your outdoor space.

Highland Cobbles

Product Description

Highland Cobbles have a similar geology and colour tone to our Scottish Beach range, but with a rounder shape and smoother texture created by glacial-alluvial movement. Additional sizes are available on request.

Sizes (mm)

400 - 200mm

Scottish Beach Cobbles

Product Description

Responsibly sourced from prehistoric beaches now miles away from the actual sea along the very northern coasts of Scotland, our Scottish Beach Cobbles can be used for a variety of different decorative applications. Offering a very classic beach pebble palette, these are made up of a mix of quartzites, granites and gneisses.

Sizes (mm)

200-100mm
100-75mm & 75-50mm

Scottish Beach Pebbles

Product Description

Offering a very classic beach pebble palette, these are made up of a mix of quartzites, granites and gneisses. When dry the stones are predominantly light grey with hints of pinks and grey-blues, in addition to other neutral hues. But when wet, these multi-grey shades become accentuated, with a mix of colours ranging from whites, greys, browns, speckled greens and sandy beige.

Sizes (mm)

50-30mm, 40-25mm,
20-14mm, 14-8mm
& 8-4mm

Angel Cobbles and Pebbles

Product Description

These gneiss cobbles are tough and hard-wearing. Angel Cobbles are suitable for mulching as well as for use in small or large water features. With their contrasting shades, Angel Cobbles will stand out in any garden scheme, particularly among vibrant green planting or alongside our Angel Standing Stones.

Sizes (mm)

60-40mm

Silver Grey Granite Cobbles and Pebbles

Product Description

These tough and durable cobbles have a chunky speckled pattern, which contrasts with the cobble's remarkably smooth and well-rounded shape. A particularly stylish and unique-looking decorative stone, Silver Grey Granite Cobbles are ideal for both traditional and contemporary landscape designs.

Sizes (mm)

60-40mm

Polished Pebbles

Product Description

Our range of highly polished siliceous pebbles will add a touch of sleek sophistication to your outdoor scheme. Polishing pebbles to a high degree means that the natural stone colours become more intense and vibrant, as if they were wet.

Sizes (mm)

60-20mm

Polished pebbles will also stay clean, making them a great low-maintenance option.

They can be used for a range of different applications, and will make a beautiful addition to any garden mosaic, planter or water feature.

Flamingo Pebbles

Product Description

Beautiful soft pinks, creams and subtle greys blend together in Flamingo Pebbles, creating a gentle, natural palette with a soothing, coastal feel. These smooth, rounded pebbles add warmth and light to any outdoor space.

Sizes (mm)

60-20mm

Ideal for mulching, borders and decorative landscaping, Flamingo Pebbles also work beautifully in water features, reflecting their delicate tones and enhancing the sense of calm.

Aegean Cobbles and Pebbles

Colours

Black
60-40 & 40-20mm

Blue
60-30mm

White
60-40 & 40-20mm

Product Description

Available in three stocked colours, these cobbles and pebbles are hand-selected for their unique colours and round shape. Like most stone, the tones and shades transform when wet, so they are fantastic to use in water features. These products are perfect for decorative use and mulching borders.

Flat Cobbles and Pebbles

Colours

White
70-50, 40-20mm

Flat Beige
70-50, 40-20mm

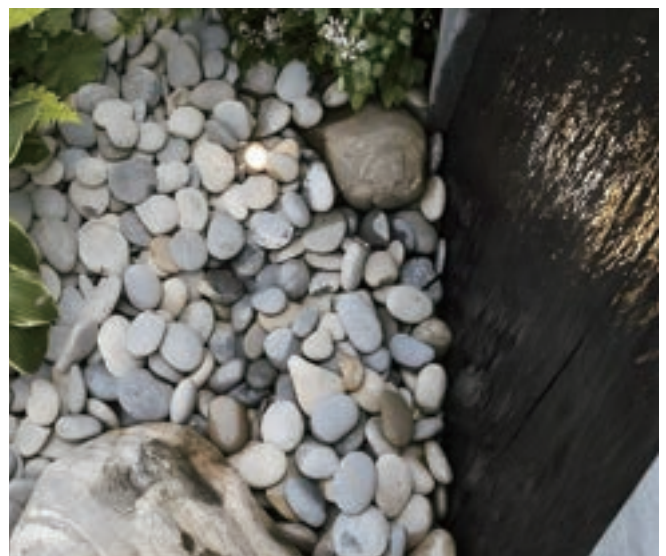

Flat Grey
70-50mm

Product Description

As their name suggests, this range of cobbles and pebbles is particularly flat with a smooth oval shape, softly rounded by water. These hand-picked decorative pebbles will bring a timeless beauty to any landscape design and can be used for a number of applications. Being the flattest pebbles in our range, they are easy to arrange and stack in water features, use in pebble mosaics or laid to make paths. They are also a particularly popular choice for use in Japanese Garden styles.

Products: Aegean Blue Cobbles

Rounded Flint Pebbles

Product Description

Smooth in appearance and naturally rounded by the sea. Rounded Flint Stones are often used as an attractive drainage medium around buildings and in inverted roofing. They can also be used for mulching.

Sizes (mm)

40-20mm

Pearly Quartz Pebbles

Product Description

A well-rounded quartz pebble. These decorative stones are ideal for use in Japanese gardens and to lighten darker areas of your garden or pathway. Pearly Quartz Pebbles hold their colour well and stay cleaner than most other light coloured pebbles and aggregates due to their low absorbency.

Sizes (mm)

12-8mm

Sperrin Pebbles

Product Description

Smooth in appearance and naturally rounded by the sea. Sperrin Pebbles are often used as an attractive drainage medium around buildings and in inverted roofing, to hold down the insulation board. They can also be used for mulching.

Sizes (mm)

20-10mm

Available in our Irish depot.

Ocean Pebbles

Product Description

Smooth and naturally rounded, Ocean Pebbles feature a beautiful blend of soft greys and subtle earthy tones, shaped over time by coastal waters. Ideal for decorative landscaping, garden borders, water features, and drainage areas, they add texture and a clean, contemporary finish to any outdoor space while remaining low maintenance and versatile.

Sizes (mm)

20mm

Section 13

Feature Stones

When it comes to bringing power and presence to your outdoor space, our range of boulders, standing stones and palisades will draw the eye and turn stone's innate beauty into a key feature.

Even the simplest of garden designs can be transformed into a dramatic outdoor scheme with a strategically placed standing stone, group of boulders or palisade arrangement.

We've carefully selected a variety of unusual and durable feature stones that will inspire a sense of wonder and mystery based on their interesting shapes, textures and colour variations.

If you need a particular stone for your project that we don't already stock in our depots, we can look at sourcing it for you. Don't forget, we also offer a bespoke drilling service – meaning that we can turn your selected feature stones into water features, peep-hole sculptures or stone balancing installations. For larger pieces, please contact us to discuss your requirements in more detail.

Standing Stones

Standing stones have been an integral part of the human subconscious since man first started to worship the gods.

Standing stones have been an integral part of the human subconscious since early civilisations first began to worship the gods. Used across cultures worldwide as stone circles, altars and monuments – with Stonehenge being the most famous example – they carry a strong sense of history, symbolism and presence.

In garden design, standing stones work beautifully as natural focal points, adding height, structure and a sculptural quality to outdoor spaces. Their organic forms contrast with planting and paving, helping to anchor a landscape while creating a sense of calm and timelessness. Whether used as statement features, wayfinding markers or subtle accents within planting schemes, standing stones bring character, movement and a connection to nature that evolves with the surrounding environment.

▲ Products: Angel Standing Stones

Riviera Sunset

Product Description

A marble based stone formed with limestone is recrystallised under high temperatures, pressures and magma intrusion.

The newly formed crystal structures give the marble a glistening, sparkly appearance, which makes it particularly beautiful in the sunshine.

The striking golden bands are the result of iron being deposited into the original limestone, mineralising into limonite over time.

Sizes (mm)

300mm-2m

Purple Schist

Product Description

Bring warmth and depth to your garden scheme with a Purple Schist. When wet, the colours deepen and intensify, making it a great material to use for water features.

Purple Schist is particularly good for bringing height into your scheme with little weight, which makes it particularly ideal for using in smaller gardens or in spaces with difficult access.

Sizes (mm)

300mm-2m

Angel

Product Description

With its contrasting shades, an Angel Standing Stone will stand out in any garden scheme, particularly among vibrant green planting or alongside our Angel Cobbles.

The Angel Standing Stone is formed from layers of calcium carbonate and clay rich sediments which have been turned into rock by heat and pressure, transforming the calcium carbonate layers into white marble, whereas the clay rich sediments mineralise to chlorite, giving the stone its dark greenish-grey colour.

Sizes (mm)

300mm-2m

Slate

Product Description

Dark and dramatic with craggy shapes, a Slate Standing Stone can be used as an outdoor feature to great effect with pieces up to 2 metres high. They can stand tall in a vertical position or be arranged horizontally in striking combinations amongst planting. For larger pieces, please contact us to discuss your requirements in more detail.

Sizes (mm)

300mm-2m

Purple Wave

Product Description

The patterns of purple can be quite inconsistent, with some stones having intricate, fine purple lines and some having large, dominant purple tones and bands, making each one unique.

Purple Wave is a marble-based rock, and its glistening, sparkling appearance is the result of the stone's limestone base recrystallising through heating by magma intrusion. The magma intrusion also causes the groundwater to boil and force its way through the marble, depositing iron-rich haematite minerals in the stone, resulting in the marvellous purple bands.

Sizes (mm)

300mm-2m

Boulders

With the correct placing, boulders can create beautiful focal points within your outdoor space – with the right planting, they can look like they've been there forever.

Natural and dramatic, our boulders are mainly sourced from Scotland and Ireland. With sizes ranging from a few kilos up to several tonnes, stone boulders make a fantastic addition to beach, stream, lake, and pool schemes.

They can be used for Natural Play designs for climbing on, or for seating – the possibilities are endless!

No two boulders are ever the same, so we suggest that you take your time to pick one that's the right size, shape and colour for your scheme. Larger boulders will, of course, have more of an impact on your design, while a cluster of smaller Boulders will create a more subtle look.

Natural stone transforms when wet, and this is no exception with boulders. Make sure you look at how the boulders will change in the rain or under water fountains, and assess whether this will still work with your chosen colour palette.

When positioning your boulders, think about burying a small portion of the stone base beneath the ground to make them look 'grown in' and natural.

For larger or more special pieces, please contact us to discuss your requirements in more detail.

▲ Main Feature Garden - Belvoir Castle Flower Show 2022
Designer & Contractor: Steve Cobb - Products: Mixed Glacial Boulders

Celtic

Product Description

These mixed boulders come in a variety of colours, but they are all predominantly green-tinged, reflecting their Irish origins.

Perfect for arranging around sculptures or building into rockery formations, these boulders will sometimes have tones of sepia and orange-brown, especially the darker, iron-rich stone types.

Sizes (mm)

Approx 200kgs to 12+ tonnes

Gabbro

Product Description

Perfect for a misty, shaded glade; these natural boulders will look like they have been there forever. With rustic and atmospheric tones, Gabbro Boulders will make an attractive addition to your outdoor space.

Gabbro Boulders are weathered and rough with flat surfaces and slightly rounded corners, making the larger pieces great for climbing on. Gabbro Boulders are formed by glaciation, but have hardly travelled at all, so they are not as round and smooth as other boulders and cobbles.

Sizes (mm)

Approx 200kgs to 12+ tonnes

Mixed Glacial Boulders

Product Description

A mixture of various colours and stone types, mixed Glacial Boulders consist of light to mid-grey granites with tones of pink, along with some finely banded grey to buff coloured quartzites and well banded black and pink coloured quartzites.

Some spectacular black and white banded gneiss can also be included, along with some other more unusual stone types, which can be supplied separately if required. These boulders are well-rounded and worn by glacial transport, although some of the quartzites can be blockier, making excellent boulder seats.

Sizes (mm)

Approx 200kgs to 12+ tonnes

Porphyry Plattens

Product Description

Porphyry Plattens are naturally smooth and flat, making them ideal for using as stepping stones laid across shallow ponds, streams or dry river beds. They're a great option for building a flatter rockery arrangement with a lower height, or setting in gravel for a Japanese garden style.

Sizes (mm)

Approx 600-200mm

Originally a slabby rock, Porphyry Plattens are moraine boulders that have been tumbled and smoothed in alpine rivers, resulting in a flatter boulder than you'd usually expect with granite materials.

Boulder Seats

Product Description

Our sawn and polished boulder seats bring together raw natural beauty and refined contemporary design. Each piece is individually selected and expertly crafted, with a precision-sawn bottom surface that provides excellent stability and a smooth, sawn-and-polished top that highlights the stone's natural character.

Every boulder is completely unique, revealing distinctive bands, textures, and markings that become more vivid through polishing. The sides are intentionally left natural, creating a striking contrast between rustic, organic edges and a clean modern finish — perfect for garden seating, feature stones, or statement landscape pieces.

Boulder Slices

Product Description

Our boulder slices combine natural character with refined craftsmanship, creating striking landscape features that balance rustic texture and modern design. Each piece is precision sawn on both the top and bottom surfaces, ensuring stability while revealing the stone's unique internal patterns.

The sandblasted finish enhance the natural bands, colours, and markings within every slice, making each one completely individual. In contrast, the sides are left raw and organic, delivering a bold visual balance between smooth contemporary finishes and rugged natural edges.

Rockery

With their own individual colours and shapes, our range of Rockery Stones will bring a natural elegance and presence that will complement any traditional or contemporary landscape design.

We've worked hard to source some of the most interesting and high-quality rockery stones based on strength, durability and beautiful colours, so you can be sure that you are choosing the best materials for your project that will stand the test of time.

Rockery stones can be arranged and positioned into interesting rock gardens or natural water features. For an authentic style, we'd recommend selecting pieces in a range of sizes and shapes and setting the stones into shallow holes dug into the ground.

Firebird Gneiss

Product Description

A beautiful, deep grey rockery stone with prominent pink tones rippling throughout, the Firebird Gneiss is a craggy and irregular-shaped quartzite that lends itself to any decorative rockery display. A popular choice with garden designers, the Firebird Gneiss transforms when wet, making it an enchanting material to use in water features and ponds. The stone takes on a more dramatic and deeper shade of dark greys and blacks, shot through with swirls of vivid, pink and white bands. The Firebird Gneiss lends itself to striking displays similar to those often found in Japanese gardens.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Golden Quartzite

Product Description

Bring a touch of colour to your outdoor space! Golden Quartzite is a wonderfully colourful rockery stone sourced from both Ireland and Scotland, which has a particularly rich and warm palette. Individual pieces are usually a golden-grey buff shade with strong blends of pale-to-medium orange and brown, and some pieces can have a stronger golden tone. As a hard quartzite, it will not take in dirt and discolour, always remaining bright for years to come.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Purbeck Limestone

Product Description

Purbeck is a light grey and cream limestone formed over 140-150 million years ago during the Late Jurassic/Early Cretaceous period while dinosaurs were still roaming the land. It was recognised by the Romans during the Bronze Age for its brilliant qualities. White Calcite veins are a common feature in Purbeck Limestone, which run in various directions throughout the stone. These rockery pieces can be quite blocky and are great for building up into a wall effect to look like a natural outcrop. Like sandstone, Purbeck will weather quickly, resulting in an authentic aged look.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Slabby Sandstone

Product Description

Hardwearing with a natural textured surface, this rockery stone is one of the most versatile stones that we bring to the market place. Slabby Sandstone is a brown, bulky rockery stone.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Often with flat top and bottom surfaces, this attractive earthy rockery is ideal for building layers and creating height in any landscape scheme. It can be used to make step ends or enormous stepping stones. Occasionally, flat pieces can be found 2-3 metres long, sometimes longer.

▲ Designer & Contractor: JR Vane Excavating

Harlequin Quartzite

Product Description

Harlequin Quartzite rockery is a wonderfully interesting material with beautiful rippled and banded colourings. It is a blue-grey banded rock with veins of pink, red, white and grey granite, all cut by pale greyish-green coated fracture planes. Some blocks are often flat on the tops and bottoms. The Harlequin Quartzite rockery stone lends itself to striking displays similar to those often found in Japanese gardens.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Weathered Limestone

Product Description

Weathered Limestone comes from the top surface of a working aggregate quarry. Popular with landscape designers due to its eroded, weathered look, Weathered Limestone is grey in colour. Usually with distinctive 'layers' running linearly in the same direction, this can be a great material to stack and create height with. This weather-worn limestone bestows a timeless quality, instantly giving the appearance of having lain exposed to the elements for hundreds of years. An easy stone to design with, just keep the stone's water lines horizontal with the ground and a very natural rockery can be effortlessly created.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Smokey Grey Limestone

Product Description

This wonderful rockery stone, sourced from the North of Scotland, has chunky sides and angles, which will bring a bold and edgy feel to your outdoor scheme. Known for its strength and durability, this dark-grey limestone has some beautiful bands of crystalline whites running through, making it an ideal product to pair with our Angel Standing Stones. These rockery stones have chunky sides and angles.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Yorkstone

Product Description

Bring a traditional rustic look to your outdoor space by using a British material that's been used for centuries. Known for its strength and durability, Yorkstone is a yellowish golden brown sandstone with some grey tones. Yorkstone rockery stones are warm and homely, and particularly ideal for building outcrops and singular features within the landscape. They will weather in quickly, giving an aged appearance.

Sizes (mm)

1-2 Man-handleable
25kg - 1t approx

Section 14

Natural Play

Build children's play spaces that evoke a sense of excitement and adventure with our natural products.

Stone is an ideal material to use in play areas. With our Play Safe Products being free from sharp or crumbling edges, they offer exciting opportunities for exploration and adventure within a safe environment.

Stone structures will encourage children to reconnect with the great outdoors and engage with natural materials. This is where your creativity can go wild; use natural stone to build exciting networks of walkways, tunnels and climbing stacks. Inspire young imaginations by designing playscapes that can become rocky outbacks, volcanoes, ancient ruins, dragon lairs or far away alien planets. They'll love exploring all the secret hiding places and rocky ledges!

Natural Play

Bringing a traditional and natural look to an outdoor play area, authentic stone is a more financially economical option to use in comparison to artificial rocks and boulders, and they'll certainly last longer, too.

Recognised for being a tough and durable material, natural stone provides a perfect slip-resistant surface for children to grip hold of and clamber across. Stone won't need regular maintenance like other play equipment, and won't need to be replaced over time.

When planning a new playscape area, we highly recommend referring to "Design for Play: A Guide To Creating Successful Play Spaces" as published by Play England and the DCSF, for helpful guidance and advice.

This publication is supported by CABE, the National Lottery (the big lottery fund), and The National Children's Bureau, and is endorsed by The Health and Safety Executive and The Royal Society For The Prevention of Accidents.

Gravelsafe®

Product Description

Exclusively developed by CED, Gravelsafe is an innovative impact-absorbing safety surfacing product. Unlike other pea gravels on the market, Gravelsafe is a well-rounded, multicoloured granite pebble, specifically free from broken or sharp elements. Their natural roundness helps the pebbles to move and roll together, almost like a liquid, offering exceptional impact-absorbing qualities. This makes Gravelsafe an ideal option for play area surfaces where children might jump or fall from play equipment.

Gravelsafe conforms to BS EN 1176 for intended use as an impact-absorbing safety surface.

Play Stacks

Product Description

These play towers are made from stacked pieces of Yorkstone, which are specifically selected at source and arranged to form chunky, slip-resistant steps and ledges that are perfect for scrambling up and jumping off.

These natural stone play structures will delight and inspire children of all ages! Providing safe and sturdy forms for climbing and clambering, this is an excellent example of how a beautifully simple structure can make a challenging play feature for children.

*Made to order

Play Boulders

Product Description

Play Boulders can be ordered in a range of heights and sizes depending on your playground's design. Naturally slip-resistant, they encourage children to climb and explore.

Giving children the opportunity to interact and engage with these natural materials will allow them to develop and grow in a beautiful and sustainable environment.

Section 15

Composite Wood

Using the very best hard landscaping materials ensures that your outdoor space will keep a superb finish for years to come.

CED Stone Landscape stock an outstanding collection of quality composite wood made with a durable composite that stands up to extreme weather conditions and everyday use.

These high-quality and versatile composite wood products are available in a range of different colours, allowing you to construct outdoor spaces that are unequalled in both style and functionality.

Our composite wood products will transform any outdoor space, and are designed to offer practical solutions at a low-maintenance level.

Designed for living, built to last.

As the exclusive UK distributors of Oakio, Ronjack brings together decades of expertise in garden landscaping, design, and manufacturing to help the trade create exceptional spaces—inside and out.

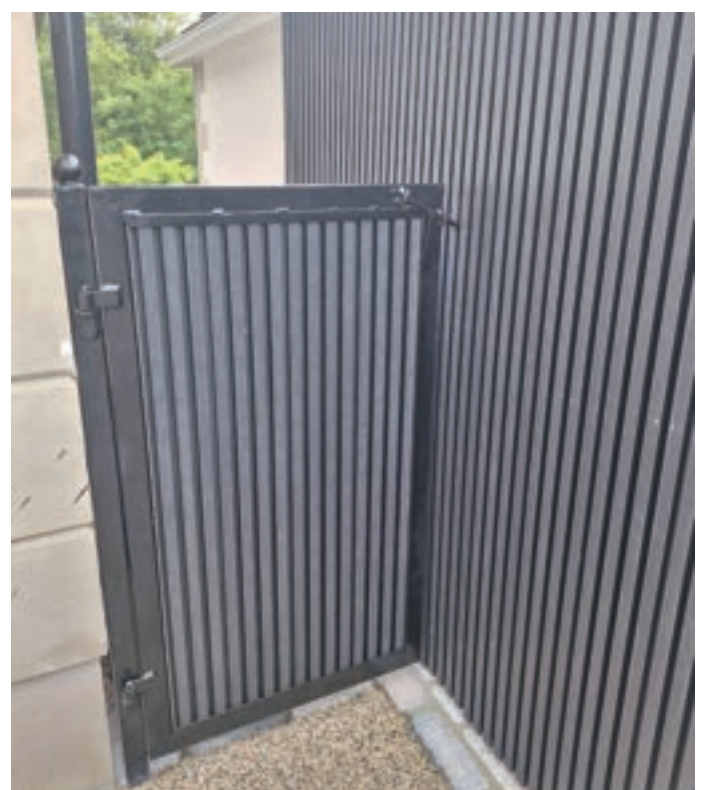

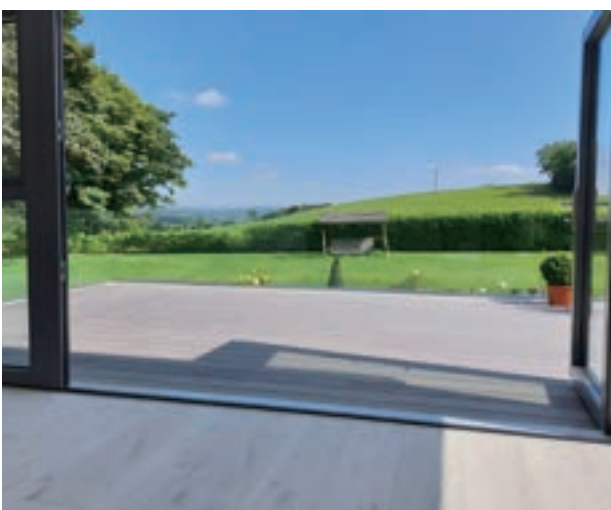

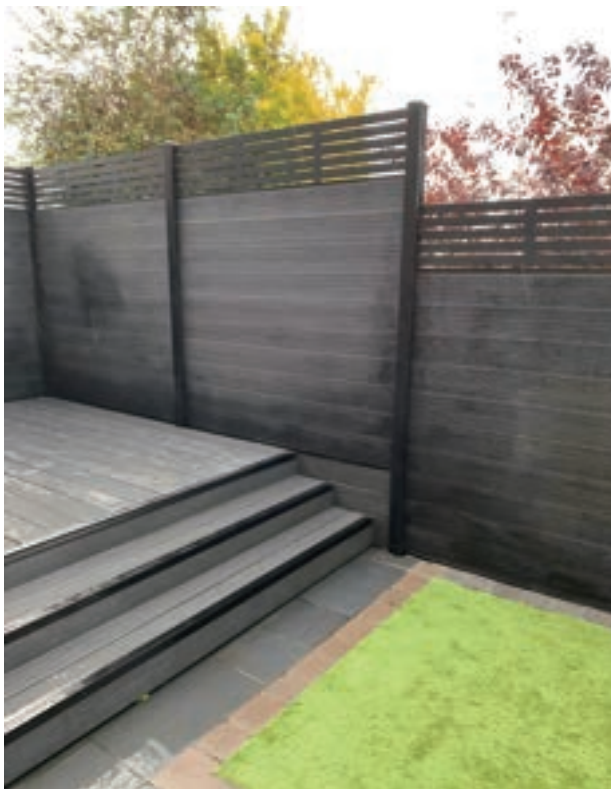

Their premium range includes contemporary decking, durable fencing, stylish cladding, shadow cladding, and innovative internal decorative solutions, all developed for modern family living and effortless installation.

Transform outdoor areas with the eco-friendly Oakio Composite Wood Decking range. Engineered as a superior alternative to traditional PVC and resin-bound products, Oakio combines natural timber aesthetics with advanced durability. The deep embossing process enhances colour variation, creating a rich, long-lasting wood grain effect that maintains its appearance season after season.

Oakio Composite Wood delivers the warmth of real timber without the maintenance. Resistant to mould, mildew, stains, and scratches, with high slip resistance ideal for ramps and high-traffic areas, it is a smart, sustainable choice for residential and commercial projects alike.

From decking and fencing to cladding solutions that redefine modern spaces, Ronjack and Oakio offer materials designed to inspire—strong, stylish, and made for the way we live today.

Schellevis

Balance and tranquility in an outdoor space.

Schellevis products offer great design possibilities for your outdoor space from block pavers and paving slabs, to copings and bespoke seating.

All products have the same structure and colour characteristic of traditional Dutch Schellevis®. Whether traditional or contemporary, your outdoor space will exude tranquility with Schellevis products.

SCHELLEVIS®

Guided by nature...

The core belief at Schellevis is that an outdoor space is well-balanced and exudes tranquillity. They achieve this by connecting architecture with nature, with respect for the environment.

Whether it's a concrete block paver or a large format slab, a swimming pool coping or a seating element, a stackable element or a step, all products are available in the same characteristic traditional Dutch Schellevis structure and colour and in any size or thickness you like.

Please note: Please visit our website to see more information regarding custom sizes, or contact one of our depots!

Sustainable: All products are made from natural raw materials and are 100% recyclable.

Unique appearance: The open structure, also known as lava or traditional Dutch structure, of Schellevis products is unique in its kind.

Variety: The products in the Schellevis range are available in a wide variety of colours, sizes and models. They combine excellently, forming a tranquil whole.

Creative freedom: Incorporate them flat, floating or standing. Both the top and side can be placed in sight, since both are provided with the characteristic Schellevis structure.

Large format: The wide range of sizes available in Schellevis large format slabs is unique.

How sustainable are the products?

Schellevis always aim for the best quality while trying to make the smallest possible impact on people and nature. They try to use as many natural materials as possible in their production process, with more than 25% of their material consisting of recycled materials currently.

Delivery of materials such as gravel and sand is by boat, the reason being that a single delivery via boat is equal to 40 deliveries by lorry. They also do their best to work with local suppliers in order to keep delivery emissions to a minimum.

Schellevis are constantly working to improve the sustainability of both their product and the process of production and delivery, aiming for minimal wastage. Their focus is to constantly test and improve their product to make it more sustainable in the years to come.

Installation & Maintenance Products

Everything you need to achieve a quality finish when installing and caring for your paved space.

To keep your natural stone paving looking good for years to come, the application of the right installation and maintenance products plays an important role and ensures that your paving is protected from the effects of modern outdoor living.

From cleaning and stain removal to joint fillers and adhesives, we've got everything you need here to achieve and maintain the perfect finish. We've used our expert knowledge to source the best brands on the market, so you can be confident that you're using something that works. For help and guidance with choosing the right products, speak to our team, who will be able to advise you.

Installation & Maintenance Products

Installation	120 - 121
Maintenance	122 - 123

Installation

To keep your natural stone paving looking good for years to come, the application of the right installation products is imperative.

Choosing quality paving installation products is just as important as selecting the paving itself. From high-performance bedding mortars and primers to durable grouts and specialist compounds, the right materials ensure strength, longevity, and a flawless finish. By investing in reliable installation solutions from the start, you can reduce maintenance issues and achieve professional, long-lasting results.

We have used our industry expertise to carefully source trusted, market-leading brands – giving you complete confidence that every product we supply is proven to perform. Whether you're a professional installer or tackling a project at home, our range is designed to help you build paving that looks better and lasts longer.

Steintec®

high performance paving mortars

Steintec are a manufacturer of high-performance mortars and materials for the construction of modular pavements.

Steintec leads the market with a range of products for bound/rigid and unbound/flexible pavement construction for both non-permeable and SuDS permeable paving. Steintec has established a reputation, over decades, as the preferred brand for performance and longevity.

- Bedding mortar binder supplied in 25kg bags.
- Mixed with tuffgrit aggregate (4 tuffgrit :1 tuffbed 2-pack). tuffgrit purchased separately.
- Water permeable and frost resistant
- 30 - 70mm bedding depth (30 - 40mm typical for bedding mortar for paths & patios)

tuff bed[®]
2-pack

- Premixed bedding mortar in 25kg bags
- For paved areas in; natural stone, granite, concrete and porcelain paving units
- Frost resistant
- 30 - 70mm bedding depth (30 - 40 mm typical for bedding mortar for paths & patios)

tuff bed[®]

- Slurry primer suitable for natural stone, porcelain and concrete paving
- Creates the essential adhesion bond between bedding and the paving element
- High resistance to shear forces and thermal stresses
- 1mm thick coat: 16m² coverage per tub / 2mm thick coat: 8m² coverage per tub

tuff bond[®]
Utility

- Self compacting jointing slurry mortar, mix with water
- For paved areas in; natural stone, granite, concrete and porcelain paving units
- Four colours available; Natural Grey, Mid Grey, Dark Grey & Beige
- Coverage up to 27 m² per tub (4 mm joint, 1200 x 600 x 20 mm porcelain flag)

tuff top[®]

- Brush-In Grout
- For paved areas in; natural stone, concrete and porcelain paving units
- Four colours available; Flint, Anthracite Cream & Hessian
- Coverage up to 31m² per tub (4mm joint, 1200 x 600 x 20mm porcelain flag)

tuff joint[®]
Utility

Foam Rubber Squeegee

- For the application and cleaning of tufftop jointing mortar.
- Designed to push materials into the paving joints, as well as removing surface residues.

Washboy Kit & Washboy Pro Kit

- Wipes away excess surface mortar.
- 23 litre bucket supplied with a sponge faced hand trowel.
- Easy to clean double roller, makes light work of cleaning the sponge.

Maintenance

Maintain your stone's high-quality finish with our range of protection and care products.

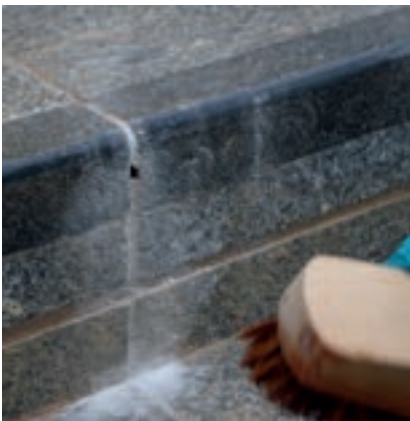

You've taken great care in choosing the perfect material for your outdoor space, so keeping your finished natural stone paving looking its best for years to come will also be a priority.

When first laid, your new natural stone paving can be particularly vulnerable to stains and marks. Over time, the pores in your stone's surface will gradually fill in with 'good dirt' from day-to-day use and exposure to the elements. This creates a natural barrier on the surface, which helps the stone's resistance to unsightly marks and staining. Despite this protective barrier, however, there are some common contaminants that will still cause staining:

- Greasy food from BBQs
- Drinks such as red wine or coffee
- Vehicle oil spills
- Tyre marks
- Algae, lichens and other naturally occurring stains

Choosing the right care products for your paving is vital; overly aggressive cleaning regimes can strip the stone's natural protective layer, rendering it vulnerable again to fresh staining and marks.

When using any chemical on natural stone, we recommend testing the product on an off-cut or inconspicuous section of your paving first, to ensure that you are familiar with how the product works and to double-check there are no adverse effects from its use.

Weiss

A professional range of Paving Care Chemicals manufactured to complement the Steintec range of paving mortars, for use on public realm and domestic projects, providing the protection, cleaning and enhancement of your paving units.

- **Pre-Install** - Protection During Installation
- **Pave Clean Pro** - PH Neutral Paving Cleaner
- **CSR Power** - Cement Stain Remover
- **CSR Extra** - Polymer Modified Mortar Stain Remover
- **Stain Protect Pro** - Invisible Stain Protection
- **Colour Enhancer** - Wet Look Paving Protection

Stontex

Discover a comprehensive range of premium stone care solutions designed to tackle every hard surface challenge. Our collection includes specialist products such as Stontex Rust Off, Platinum Stone Sealer, Paver Plus, Oil Spot Remover, the ever-popular Green To Clean, All In One Outdoor Cleaner, and Stontex Colour Intensifier – all carefully selected to help protect, restore, and enhance your paving.

Stontex Green to Clean

This cleaner prevents algae and moss!

Green To Clean is a microbiological surface biocide cleaner which is highly effective for the removal of algae, moss, lichen, fungi, mould, bacteria & viruses on external hard surfaces.

All In One Outdoor Cleaner

Ultimate cleaning power for outdoor spaces!

This All-in-one Outdoor Cleaner is a high-quality, intense cleaner for a deep, one-off clean. Suitable for most outdoor surfaces, including driveways, paths and patio areas.

Stontex Colour Intensifier

Seals, Protects and enhances natural stone hues!

Colour Intensifier is a solvent based colour enhancer and impregnator that penetrates into the surface of the stone to protect against oil and water based stains.

Bespoke Masonry Services

Stone is a wonderfully diverse material to work with, and at CED Stone Landscape, we are well equipped to craft anything from stone with our bespoke masonry services, tailor-made to your requirements!

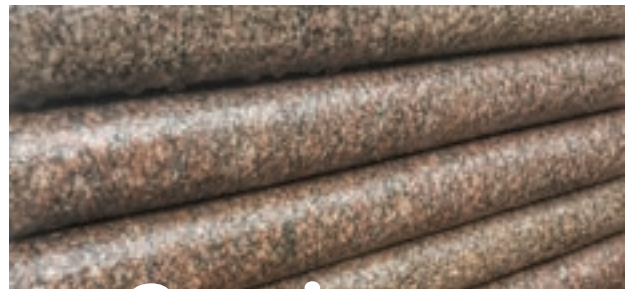

We know that your imagination has no limits, so there shouldn't be a limit on what you can achieve with natural stone either.

Our expert team can turn your unique hard landscaping concepts into a reality, from curved granite benches and hexagon paving tiles to custom water features and planters. Provide us with an idea, a simple sketch or a finished technical drawing, and we'll take care of everything else.

Bullnose Edging

A stone with a rounded, curved edge that's ideal for stone and porcelain steps, benches, wall copings, pool surrounds, planter tops, pier caps and other ledges. Bullnosing reduces the risk of chips and creates an attractive, contemporary style.

For bullnose pier caps and wall copings in particular, our masonry teams will include drip grooves, which will catch moisture and rain droplets. This will help to avoid water damage, wall staining and frost-heave on the coping stones. We can also produce stones with a half bullnose, regency, cove or chamfer edge, depending on your custom design.

Cutting

Paving shouldn't come in set sizes – we are able to take your bespoke measurements and cut your chosen material into the perfect length or shape. Using our specialist tools and techniques, we can cut paving slabs, radius kerbs, edging and even rocks or boulders to make them just the right size for your unique project.

We're also able to cut any of our natural stone or porcelain paving materials into specific shapes, using advanced water jet cutters.

Ideal for creating paving circles, commemorative headstones, curved step treads, artistic wall panelling, water features, shaped stepping stones and geometric paving slabs, your made-to-order design will be cut with perfect precision and care.

Cropping

Cropping is a splitting technique which is used to break down larger natural stone products into smaller ones, for example when cropping larger rectangular paving setts into cubes.

Using a specialist cropping machine, the technique naturally splits the stone, creating a rough, rustic side or surface.

Cropping is a great technique to use for resizing reclaimed materials, when a neatly sawn edge might spoil the rustic, aged appearance.

Drilling

We can drill holes into any type of natural stone product, no matter the size or thickness. This simple technique allows for a range of bespoke stone creations.

Create a patio perfect for evening entertaining, with outdoor lighting set into carefully drilled holes in paving slabs. Cobbles and boulders can be cored and fed through a steel support pole to create a stacked 'stone balancing' sculpture.

Peep holes can be drilled into the sides of a feature stone for a modern, contemporary art installation. The possibilities are endless!

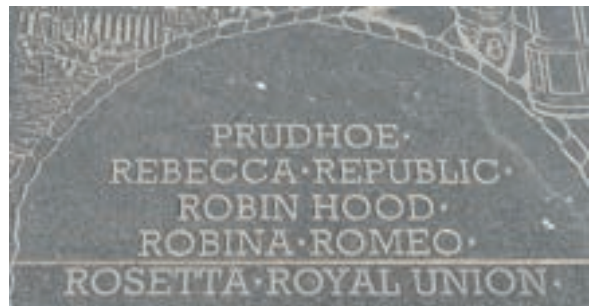

Sandblasting

Sandblasting erodes the surface of the stone to leave a rough, non-slip texture by using high-pressure jets of abrasive-laden water, and works well on sedimentary stones such as sandstone or limestone.

Although all of our paving has a safe slip resistance rating,

sandblasting can be an effective technique to use on sandstone and limestone paving designated for particularly high slip risk areas, such as pool surrounds or spas.

Sandblasting is also used to add a roughened texture to the edge of steps or coping stones, but can also be used to create a worn look.

Flame Texturing

Resulting in a premium look, flaming is a more suitable technique to use for giving texture to igneous materials like granites (excluding Yellow Granite) and basalts.

Applying a high temperature flame 'scorches' and fractures the crystals on the surface of the stone, creating a coarse, slip resistant texture.

Flaming the surface will still show the true colours of the natural stone, making it an ideal technique for creating beautiful non-slip paving, bullnose steps, coping stones and pool surrounds.

Helping You Choose: Material Samples

Samples are an essential tool for choosing the perfect stone for your landscape scheme.

If you're ever visiting one of our CED Stone Landscape Depots, then our team will always have a full range of samples available, which you're welcome to take home with you.

But it's also easy to request samples of our products by post. Contact us on (+44)1708 86 72 37 or email samples@cedstone.co.uk and we'll be happy to deliver a selection, from examples of aggregates and pebbles to small paving tiles. Larger samples, such as paving slabs, can also be arranged on request.

Our prompt and quick service is always appreciated by our customers, especially when a last-minute design meeting has been booked.

Your samples will all be individually labelled, detailing their country of origin, material reference and finish. For the more unusual and rare sample requests, we can look to our extensive geological library – an impressively detailed collection started by our Chairman, Michael Heap, back in 1978.

The library features hundreds of materials sampled at quarries from all over the world, meaning that we can specify, source and order materials that we don't usually stock, especially for our customers.

Your own sample library, always to hand!

Ideal for using in client meetings, making mood boards and giving design presentations, our complimentary sample pack is available for free on request.

Keep this useful and professional-looking resource on hand to present to your clients to help them visualise different natural stone colours and finishes.

Need to leave some samples behind with a client? Let us know, and we'll send a replacement to make sure you've still got a full set at no extra cost.

Material Matching

Whether you need to replace some cracked paving slabs in the garden or top up an old gravel footpath that's looking a little bare and patchy in places, CED Stone Group are here to help!

When it comes to material matching, we understand the importance of correctly determining the type of stone you want to replace, and the process of finding the most suitable alternative if the exact match is no longer available.

The problems associated with choosing a poor match for your landscape can have a huge impact on the overall look and performance of your project, so it's vital to find the right materials.

Whilst there's never been so many products in the marketplace, the nature of natural stone means that over time, supply from specific quarries can become depleted, and some materials can be discontinued.

Occasionally, it can be tricky to find an exact match every single time, but there's always a suitable alternative and with our knowledge you can be assured that there is nobody better placed to help you to find it. Our in-house team include experienced geologists, who will try to identify the technical aspects of your material and help you to find the closest substitute, in both performance and appearance.

Simply send us a sample or a picture of the stone you would like us to match, or come and visit us at one of our depots, and through a consultative approach, our skilled team will be able to identify the material for you.

Our People

Experts in our field

With more choice than ever when it comes to selecting the correct materials and products for your outdoor space, choosing the right one will make a significant impact on the finish and longevity of your project.

Our people really are experts in their field – they stay with us, and the knowledge that they gain over the years is incomparable. With a wealth of expertise gained from over forty years in the industry, we can easily offer friendly and helpful advice to make sure you select the perfect product for your design.

When you choose CED Stone Landscape, you're choosing to work with skilled professionals who will strive to provide you with a fast and effortless service. We pride ourselves on being a family-run organisation with every member of the team working together and contributing their expertise to ensure that you receive the best experience with us. Our customers come to us time and again because they trust our ability to offer honest advice, get their orders delivered quickly and find solutions to their problems.

Our employees have extensive experience in the industry, with some being with us for over 25 years!

Our dedication to staff training and development means that our people feel like they're reaching their full potential in everything they do, and have the knowledge and skills to help you make the right product choice. We're always introducing new specialist products to our ranges, and our teams are always trained on the uses and benefits of each one.

We run management training and development programmes for our trainee managers, arrange quarry visits and help our staff to study and gain new qualifications, so our people have an exceptional understanding of how different characteristics and properties of natural stone materials can bring your landscape project to the next level.
